

UNIVERSAL VRF CONTROL MADE SIMPLE.

One controller. One interface. Any major VRF brand.

ZoneMate Touch PRO gives installers and building owners a consistent, modern control solution for VRF systems — eliminating brand-specific wall controllers and simplifying commissioning.

KEY FEATURES

- One controller to stock and support
- Faster commissioning
- Fewer user callbacks
- Clean, modern touchscreen
- Perfect for retrofits & new builds

ZONEMATE®

Powered by
Milieu Climate®

WHAT IT DOES

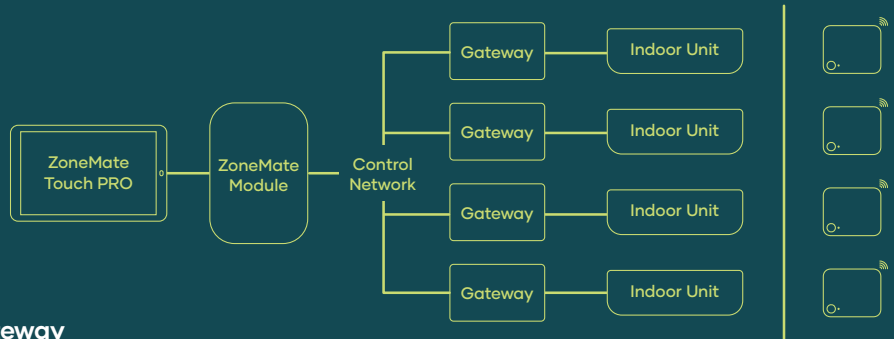

- Replaces proprietary VRF wall controllers
- Standardises user experience across mixed-brand projects
- Integrates with Intesis Gateways for reliable VRF communication
- Uses wireless room temperature sensors for accurate zone control

IDEAL FOR

- VRF heat pump & heat recovery systems
- Apartments & multi-residential
- Hotels & serviced apartments
- Commercial offices
- Mixed-brand VRF installations

HOW IT WORKS

Each VRF indoor unit is controlled through a dedicated Intesis Gateway, providing two-way communication with the VRF system.

ZoneMate Touch PRO
User interface

Intesis Gateway
VRF protocol interface

ZoneMate Module
System controller & logic

Wireless Temp Sensors
Accurate room sensing

Supports up to 12 indoor units and sensors

Wireless temperature sensors report room temperature directly to the ZoneMate system for accurate control.

PLAYS WELL WITH OTHERS

ZoneMate Touch Pro is compatible with all major VRF brands.

(Via approved Intesis gateway models)

WHY IT MATTERS

- No reliance on indoor unit return air sensors
- Consistent control logic across all zones
- Scales cleanly from small VRF systems to large projects

TOSHIBA

Panasonic

FUJITSU

HITACHI

SAMSUNG

Hisense
