

## CARBINE HARDWARE

Carbine is the next generation in locking. Carbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been

the way'. Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years. The Carbine Hardware range incorporates door hardware and trim plates, cabinet and furniture locking, window & patio door locks. All Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

## LOCK BOLTS

Carbine Orblok bolts have long been the choice of security specialists when it comes to locking up shop doors in commercial applications. They can be used for either aluminium or timber doors and have a rekeyable cylinder allowing for a range of rekeying options if required. Features include:

- Unique square locking bolt offers difficulty for would be intruders
- Has a bolt projection of 33mm (with the standard size bolt) from the body of the lock in the locked position
- Bolt can be locked into an open position
- Extended bolt models available if needed
- Available in concealed fixing
- Has an easy to grip knob allowing easy lifting of the bolt to either open or close
- Rekeyable oval cylinder allows for restricted or future rekeying
- Provided with a 6 pin C4 keyway cylinder, keyblanks available, use Keyline LK-W9 (Silca LW5)
- Available in finishes of silver and polished brass

Note: All models now supplied with 4 fixing bolts 62-9308997
