## Light Switches & Sockets

Tradco's wide range of power switches and sockets includes Porcelain Base, Traditional, Federation and Fluted ranges; through to our range of flat plate switches, sockets, dimmers and fan controllers. We also offer traditional ceiling pulls, plus television, phone and computer plug accessories. Our electrical components are manufactured in Australia by HPM and Clipsal and meet all relevant Australian standards.

Our electric switch and socket range is offered in our market-leading range of finishes including: Polished Brass, Antique Brass, Antique Copper, Chrome and Satin Chrome. Our power switch and socket covers are crafted from solid brass and we also offer a marine-grade stainless steel range of covers.

To complement our traditional-style switches and sockets, we also offer a range of timber mounting blocks in classic and traditional profiles. Please take the time to look through our site and view our full range of style, size and finish options. Also, we encourage you to download our comprehensive brochures for future reference.
