

FOUNDATION
COFFEE

Milk Powder

1kg

Product Description

This Foundation Coffee Milk Powder is crafted from light blue skim milk that contains lactose, yet it maintains a rich dairy flavour.

Typically, milk powder is the dehydrated form of milk, produced by removing water through a drying process.

This easy-to-use bag makes about 100 hot milk beverages, making it a convenient choice for both home and commercial use.

The milk powder is designed to blend smoothly with coffee, providing a creamy, authentic milk taste that enhances your coffee experience.

Its lightweight and compact packaging makes it easy to store and reduces the use of plastic bottles, perfect for on-the go lifestyles or for use in cafes, offices, and households.

Whether you're preparing a warm cup in the morning or serving guests, this milk powder offers a practical and flavorful solution.

NUTRITIONAL INFORMATION
