

# LEE Rifle Quick Trim Die 300 AAC BLACKOUT

TRIM TO LENGTH 1.348 to 1.368 inches

Spin lock ring to end thread. Screw die completely into press; finger tighten lock ring. This raises press lever to an elevated, comfortable position. Trim with instructions included with Quick Trim.

Remove spacer on Quick Trim tool.

If using the **Deluxe Quick Case Trimmer**, the

chamfer blades may cut too aggressively on this small caliber case as spring pressure is optimized for a .30 cal case neck. To reduce chamfer spring pressure, remove cutter assembly from crank and remove the  $\frac{3}{8}$  spacer ball. Don't lose the ball — you need it for larger calibers.
