## DIVERTRON

**\$1,799**  
SAVE \$326.20

### SPECIFICATIONS:

Max Head: 45m  
Max Flow: 95 l/min

### DAB-DIVERTRON900A

(Submersible pressure pump)

The second generation of Divertron has been improved in terms of appearance, technical and technological content in order to increase its performance and reduce its consumption.

Ideal for irrigation and gardening and for the reuse of rainwater, it can be installed inside collecting tanks, wells and tanks with a maximum immersion depth of 12 metres.

- ✓ Incorporates an electronic automatic restart pump control with dry run protection
- ✓ Fully automatic operation
- ✓ In-built non-return valve and flow sensor
- ✓ Supplied wired and ready to install
- ✓ Quiet operation
- ✓ Simple installation
- ✓ A small pressure tank (2-8L) is recommended
- ✓ Does not require external pump control

#### HANDY TIP

Install with a BPT 3L Tank for best performance

## esybox DIVER

THE FUTURE OF WATER PRESSURISATION

Pump only  
**\$3,749**  
SAVE \$419.25

With DOC68

SAVE \$438.85

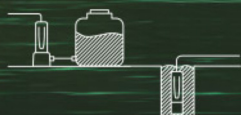

### DAB-ESYDIVER-55/120

Max Head: 55m  
Max Flow: 120 l/min

Use the DOC68 to install outside of your tank

Esybox Diver is the first electronic submersible pump with integrated variable frequency drive to have a remote control user interface. Electronics and connectivity are combined to make for an efficient and versatile product suited to the needs of every user: *a thousand solutions in one for residential domestic pressurisation.*

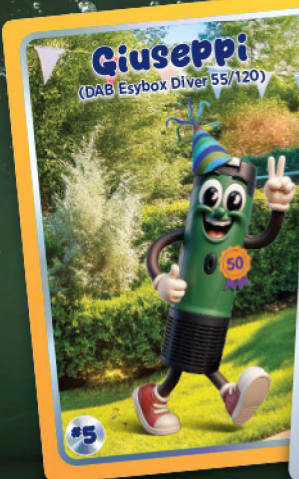

#### VERSATILE AND FLEXIBLE

One model and a set of accessories offer the performance of a complete range: Standard version for cistern or well installation and dry version for surface installation.

Suitable for domestic households, small apartment complexes and commercial applications.

### D+CONNECT

#### ALWAYS UNDER CONTROL

The DConnect Box 2 allows access to the H2D cloud platform. In this way, you can personalise the settings, check consumption, and set the alarms and pressurisation directly on your smartphone or tablet, wherever you are!

H2D is the new smart platform, available as a mobile app or in a desktop version, that reveals what is happening inside the installations, allowing to optimise operations and save resources. Data and subscription charges may apply.
