

Description

Tork SmartOne T9 refills are now locally made with better quality, reducing the carbon footprint by 6.8%*. Our Kawerau site in New Zealand is the only tissue mill in the world using geothermal steam to power production. The Tork SmartOne Mini Toilet Roll System uniquely delivers one hygienic sheet at a time, helping to reduce consumption by up to 40% compared to traditional jumbo roll dispensers, which means more visits per roll. Tork SmartOne Mini high-capacity rolls are suitable for demanding washrooms from low to medium to high traffic, depending on which Tork SmartOne Mini dispenser is chosen.

Please note, the new toilet rolls have a perforated core which improves robustness during transport. For instructions on removing the core, please see video below:
