

Description

Industrial spaces call for durable cleaning cloths that can handle a range of tasks. These heavy-duty cleaning cloths effectively tackle oil and grease while protecting hands from heat and metal scraps. Promote sustainability and cut costs, too. We 2011*, have lowered the CO2 emissions for Tork exelCLEAN® by 28% since and exelCLEAN® technology reduces solvent use by up to 41%. Their single-sheet dispensing cuts wastage and the packaging is made from recycled materials for an extra eco-friendly boost. *(Life Cycle Analysis) LCA conducted by Essity and IVL Svenska Miljöinstitutet in April 2021

- Easily remove stubborn oil, grease and water marks in industrial environments and save time with these multipurpose cleaning cloths.
- Save money by replacing expensive rental towels – these durable cleaning cloths are suitable for repeated use.
- Protect hands from heat and metal scraps in industrial spaces, thanks to these cloths' heavy-duty design.
- Help the operations and environment by using less solvents – our exelCLEAN® cloths reduces solvent use by up to 40%.
- Optimize consumption and minimize waste of cleaning cloths with the One-at-a-time dispensing feature.
- Improve your operation's sustainability – this product packaging is made out of 100% recycled fibres and at least 30% recycled plastics.
- Aviation certification
- Tork Easy Handling® Packaging
- Professional use
- Strong and absorbent
- Tough on dirt
- Efficient

Environmental Information

Raw materials	Cellulose pulp Polyester Polypropylene Functional agents or additives
Cellulose Pulp	Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibres. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.
Polyester	Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerets and cooled with air. The fibres are then cut to intended fibre length.
Polypropylene	Polypropylene or polypropene is a thermoplastic polymer made from oil. The moten resin is spun to endless fibres through spinnerets and cooled by air. The fibres form a web.
Functional agents and additives	Functional additives could be wet strength agent, antistatic agent and wetting additives /tensides.
Food Contact	This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.
Environmental certification	This product is certified for FSC®.
Packaging	Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
Article creation date and latest article revision	Date of issue: 04-02-2022 Revision date: 13-02-2025

Tork Heavy-Duty Cleaning Cloth
