

Bio-QSR

Readily Biodegradable powerful Floor Cleaner and Restorer for Quick Serve Restaurants.

Bio-QSR incorporates biological, enzyme and biodegradable ingredients in a neutral formula designed to replace harsh acid, bleach and alkali chemicals. It is fast becoming the product of choice for environmentally sustainable organisations. Bio-QSR contains 5 swift acting enzymes targeting oil, grease, chips, sugars and protein.

Bio-QSR contains naturally occurring bacteria with enzymes and readily biodegradable surfactants blended to swiftly remove grime, dirt, odour, blockages caused by fats, oil and grease (FOG) which collect in pipes, floors, grease traps, effluent, sewage and wastewater systems.

It will quickly remove foul odours caused by a build-up of fat, oil, grease and waste, and prevents the odour from returning with regular maintenance. **Bio-QSR** is an excellent cleaner for all hard surfaces including bathrooms, showers and toilet blocks in QSR where high traffic is experienced.

After cleaning, take the wastewater and dispose of it in the urinal or toilet if no urinal is present. Over time the regular dosing of the urinal will slowly remove uric crystals removing the need to use harsh acids.

Highly concentrated and is used at 100 and 200 parts to **Bio-QSR** in warm water.

FEATURES & BENEFITS

Readily Biodegradable

Powerful blend of Enzymes and Probiotic bacteria

Additional downstream benefits for grease trap and sewers

ph neutral and safe for all surfaces

Swiftly removes Fat, Oil and Grease from floors

Continues to work after application
