

# Bio-CAN

Readily Biodegradable Safe Toilet Cleaner

**NON-ALKALINE | NON-ACIDIC | NON-TOXIC** Bio-CAN Environmentally Sustainable Readily Biodegradable toilet cleaner. Non-Acidic, Non-Alkaline, Non-DG, Septic Safe and Neutral. Environmentally sustainable for removing soil, odour and has the added benefit of beneficial bacteria which makes your drain, septic and sewer system healthier. Can be used for showers, RV Cassettes and Marine Holding tanks.

**Bio-CAN** is part of our new generation cleaning system called B+B=C. This means Biological + Biodegradable = Cleaning

**Bio-CAN** contains a blend of naturally occurring safe biological ingredients, powerful enzymes and readily biodegradable surfactants blended to swiftly remove grime, odour and solid deposits. It will remove Fat, Oil and Grease deposits down the line to improve the general health and wellbeing of your drain system.

**Bio-CAN** can be used in all toilets, showers and other areas where odour and soil is within a bathroom situation.

**Bio-CAN** can also be used as an RV cassette and Marine holding tank for water treatment. Just apply directly 50 - 100 mls into the toilet or cassette and it will naturally eat the solids and maintain the odour levels.

**Bio-CAN** will also assist in the managing of Hydrogen Sulphide levels.

## FEATURES & BENEFITS

- Replaces harsh acidic, bleach and alkali chemicals
- Readily biodegradable
- Non-corrosive and neutral
- Safe and positive for septic systems
- Pleasantly fragranced
- Removes odours and consumes solids

**BIOLOGICAL +  
BIODEGRADABLE =  
CLEANING**

# BioRANGE

## Nature managing Nature

**Biological cleaning – the next generation of cleaning from BioChem Solutions.**

Unlike traditional bacteria based liquids which remain impotent in the water column, our patented foaming system and foaming products allow active constituents to remain in the 'inter-tidal range' where common issues lie.

### SINK & DRAINAGE PIPES

### SEWER WELL + GREASE TRAPS

### HOW IT WORKS & WHY

Liquid bacteria work – just not effectively in the fast flowing water column. Liquid-based bacteria require large concentrations to make a difference and are quickly flushed away down stream requiring constant re-dosing – a costly exercise that's not viable in the practical world. Through the use of an expanding foam, concentrated bacteria and readily biodegradable surfactants, we are able to target the problem areas – the inter-tidal range, walls, equipment and top of pipes.

By elevating the product to these areas of interest, the triglyceride hard fat is converted to a liquid mono or diglyceride fat which is now available to all populations of bacteria in the system, further enabling the effectiveness of the treatment.

\*Approved for importation and exportation in Australia, New Zealand, Fiji, Samoa and The Cook Islands by Bio-Security and other relevant government agencies.

### OUR PRODUCTS

**BioFOG**  
Bio-Agent for Fat, Oil  
+ Grease Removal

**BioFOAM**  
Readily Biodegradable Foam  
for Waster Systems

**BioFOAM+FOG**  
Fat Emulsifier • Odour Suppression Blanket

**BioBUGS**  
Fat, Oil, Grease • Odour Removal

**BioCLEANER**  
Readily Biodegradable Fragranced  
Cleaner • Odour Remover

**BioCAN**  
Non-Acidic, Non-Alkaline Readily  
Biodegradable Neutral Toilet Cleaner
