

DESCRIPTION

Air Freshener is a superior performing odour suppressant formulated to manage difficult odours in hotels/motels, hospitals and age care facilities.

It has a lingering non-cloying fragrance. It can be sprayed directly into the air or for better results onto fabrics such as carpets near the wall, at the back of curtains, chairs and mattresses.

It has the enhanced capabilities of being a mild disinfectant for areas such as toilets and bathrooms.

FEATURES AND BENEFITS

- Readily Biodegradable
- Neutral when diluted to solutions
- Long lasting fragrance
- Has disinfecting properties
- Able to be diluted - great economy

DIRECTIONS OF USE

Rooms and Air Freshening:

Dilute 3:1. Spray onto a surface to retain all the chemical like a curtain, mattress, mattress cover, carpet or behind the toilet. Test for colour fastness first. If you spray into the air generally it goes out the window or on the floor which is a potential trip hazard.

Hard Surfaces:

Dilute 5:1. Using a spray bottle apply to the surface and wipe off using a dry cloth or microfibre cloth. It will leave the surface clean and freshly fragranced.

Floors and Large Surfaces:

Put 100 ml into a bucket of warm or hot water. Use a Microfibre mop or string mop.

FIRST AID & SAFETY INFORMATION

Eyes: Avoid contact with eyes. If in eyes, hold eyes open and flush with water for at least 15 minutes

Skin: Rinse with water.

Swallowed: Do not induce vomiting, give a glass of water.

More information is available on Safety Data Sheets.
