

DESCRIPTION

Cleaner Sanitiser is powerful and concentrated.

Apply at the correct dilution to disinfect surfaces, implements and equipment.

Do not use on Therapeutic Devices.

DIRECTIONS OF USE

Utensils Soaker: Dilute Sanitiser 1:40 (25 ml per litre) with water for use as a food utensil storage solution. Replace solution when soiled or consult your distributor representative. Depending on the soil in the solution will depend on how often you will need to replace the solution.

Sanitiser: Dilute Sanitiser 1:20 (50 ml per litre) with water for use and sanitising on hard surfaces, food surfaces, equipment and floors. Allow the surface or equipment to drain and dry – rinse if necessary.

Direct contact with prescribed goods must be prevented and treated surfaces adequately rinsed and drained with potable water before processing operations resume. Do NOT mix other detergents or chemicals.

FEATURES AND BENEFITS

- Readily Biodegradable
- Has disinfecting properties
- Able to be diluted - great economy
