

Digital baby scale with breast-milk-intake function seca 354

▲ Breast-milk-intake function • Weighing tray easy to detach from base •
Baby scale and floor scale for children in one • Mobile and robust for easy transport

Reliable protection for healthy growth

Feeding plays an essential role in the healthy development of a newborn child. With the new baby scale seca 354, you can now, at the touch of a button, control every day how much milk your small patient has drunk when breast fed. seca can thus now provide the probably most reliable partner when it comes to monitoring the feeding of babies. The seca 354 is not only ideal for use in baby wards, pediatricians' surgeries and for midwives but also for use by parents who wish to control at home the weight of a newborn and how much milk it has drunk.

Security and protection

Babies can be weighed safely and comfortably in the weighing tray of the seca 354. The rounded shape of the tray with its slightly raised sides makes the baby feel safe. With the breast-milk-intake function, one can determine how much milk the baby has drunk when breast fed. Because, at the touch of a button, the weight of the baby determined before feeding is deducted from the weight determined after feeding.

Baby scale and floor scale for children in one

The baby scale can be converted into a floor scale with a capacity of 20 kg in no time at all. The tray can be detached from the base by pressing a button. When locked, the secure fitting between tray and base ensures that the baby scale is easy to lift and safe to transport.

Easy to operate due to self-explanatory button functions

The seca 354 is easy to operate due to its intuitive operating concept with self-explanatory buttons. The HOLD function means that the baby can first be taken care of before one has to read off the result. With the TARE function, the weight of nappies or soft mats can be reliably deducted.

Mobile and robust for easy transport

Its compact, robust construction predestines the seca 354 as the scale for all those who have to be mobile in the interest of the health of their youngest patients. The power-saving battery operation – up to 20,000 weighings with just one set of batteries – makes the scale independent of electricity power supply. The practical optional carrying case seca 414 is ideal for transporting and safely storing the baby scale.
