# SPIRO USB

BI02525STK

**CareFusion**

The SpiroUSB is a revolutionary new type of Spirometer that plugs directly into the USB port of your PC, without the need for any additional docking station or data uploading. Using a Laptop or Notebook, with the SpiroUSB allows complete portability. Designed for the professional, the SpiroUSB features the CareFusion renowned Gold Standard transducer. The instrument is very fast, yet simple to use, allowing instant recognition of the transducer to automatically open and run the accompanying software.

The SpiroUSB is supplied with Spirometry PC Software (SPCS). With a userfriendly multi-window interface, up to 58 spirometric indices can be measured. Both Open and Closed loop test techniques can be used and graphical child incentives are included. The long term trending of patient results, lung age calculation, and textual result interpretation are also featured.

The Spirometry PC Software can be easily linked to other patient journal or GP administration systems, occupational health or medical databases.
