

Intermittent Closed Catheterisation System

PRODUCT DATA SHEET

DESCRIPTION

Our Intermittent Closed Catheterisation System is sterile and pre-lubricated with a hydrophilic gel, so no additional preparation is needed. The closed system works like a traditional Nelaton Catheter and provides a simple catheterisation that reduces the risk of urinary tract infections.

FEATURES AND BENEFITS

- Sterile closed system
- Pre-lubricated
- Heat polished eyelets
- Smooth round tip
- Colour coded
- Latex free
- Sterile EO
- Bag size: 1500mL
- Side holes: 2
- Length: 42cm
- Material: PVC
- DEHP: No
- BPA: No
- ARTG Number: 211796
