

ABOUT

LiquaSorb X700

Liquasorb X700 coir absorbent is made from 100% coconut husk. It is a lightweight and high performance granular absorbent, suitable for hazardous liquid spills including oils, fuels, lubricants, paint, most chemicals and corrosives.

Environmentally friendly Liquasorb is non-toxic and carcinogen free. It is a biodegradable, non-leaching and landfill safe alternative to clay absorbents. Liquasorb Coir Oil Absorbent sweeps clean and leaves no residue.

2. PROCESSING

Coconut husks are processed at the source, minimising associated transport and production costs.

3. SHIPPING

Liquasorb X700 is lightweight and efficiently packaged, reducing transport and handling impacts.

1. HARVESTING

Liquasorb X700 is harvested from coconut husks, an abundant natural waste product. No tree cutting or mining.

4. INDUSTRIAL USE

Absorbs all types of spills efficiently, without the need for secondary clean up. Reusable until saturated.

5. DISPOSAL

Requires less energy for disposal. Disrupts the landfill waste stream by reducing absorbent waste.
