

LOCKWOOD GUARANTEED/AUSTRALIAN CONSUMER LAW GUARANTEES/WARRANTY

LOCKWOOD GUARANTEED

By purchasing an ASSA ABLOY Australia Pty. Ltd ("ASSA ABLOY") Lockwood branded product, you can be confident that the product has been designed and manufactured to the high standards of quality and reliability for which Lockwood branded products are renowned.

WARRANTY

1. **Warranty** - ASSA ABLOY also warrants that each of its Lockwood branded products will be free of defects in material and workmanship (including mechanical parts) for a period of 25 years from date of purchase of the product with which this document is given, subject to the limitations and exclusions set out below ("Warranty").

2. **Limitations** - Unless otherwise expressly provided for in writing, the Warranty in clause 1 above is limited, varied or excluded (as the case may be) in respect of each of the items below as follows:

(a) **Electrical and Electronic Components** - ASSA ABLOY warrants that electrical and electronic components used in ASSA ABLOY's Lockwood branded products (excluding PADDE series products, electric mortice locks & batteries) will be free of defects in material and workmanship for a period of 3 years from the date of purchase. Batteries are not covered by the Warranty.

(b) **PADDE Series and Electrical Mortice Locks** - ASSA ABLOY warrants that ASSA ABLOY's PADDE series of Lockwood branded products and Lockwood branded electric mortice locks will be free of defects in material and workmanship for a period of 5 years from the date of purchase.

(c) **Keys** - ASSA ABLOY warrants that keys used in ASSA ABLOY's Lockwood branded products will be free of defects in material and workmanship for a period of 12 months from date of purchase.

(d) **Finish** - ASSA ABLOY's Lockwood branded Everbrass finished products are coated both on the exterior and interior with an anti-tarnish finish, which is warranted to be free of defects in material and workmanship against corrosion, tarnishing and discolouration for a period of 25 years from the date of purchase of the product.

ASSA ABLOY's Lockwood branded brass door furniture products come with **Stainless Steel**, **Polished Stainless Steel**, **Chrome Plating**, **Natural Anodised Aluminium** or **Satin Chrome Plating** finishes, such finishes are warranted to be free of defects in material and workmanship against corrosion, tarnishing and discolouration for a period of 10 years from the date of purchase of the product. ASSA ABLOY's Lockwood branded brass door furniture products come with decorative finishes **Antique Copper**, **Architectural Bronze** **Unlacquered**, **Oil Rubbed Bronze**, **Aged Brass**, **Architectural Bronze**, **Polished Brass**, **Satin Brass**, **Polished Brass** **Unlacquered**, **Satin Brass** **Unlacquered** or **Powdercoated** finishes, such finishes are warranted to be free of defects in material and workmanship against corrosion for a period of 2 years from the date of purchase of the product. Brass door furniture products with decorative finishes naturally age and their appearance will change over time according to the exposed environment and use. The Warranty does not apply to natural change of colour of Brass door furniture products with decorative finishes.

ASSA ABLOY's Lockwood branded **Symmetry** range of products come with a finish, such finishes are warranted to be free of defects in material and workmanship against corrosion, tarnishing and discolouration for a period of 5 years from the date of purchase of the product. All other finishes other than those specified in this clause 2 are excluded from the Warranty, and the Warranty will not apply in respect of the finishes of other Lockwood products nor to cosmetic or appearance damage regarding the same.

(e) **Stainless Steel** - Stainless Steel is not stain free but stain less, compared to ordinary carbon steel. Tea staining is a natural process that may happen to stainless steel products if not cleaned regularly and pursuant to ASSA ABLOY instructions. The Warranty therefore does not cover tea staining of Stainless Steel products.

ASSA ABLOY CARE AND MAINTENANCE RECOMMENDATIONS

IN ORDER TO GAIN THE MAXIMUM LIFE FROM YOUR ASSA ABLOY PRODUCT, CORRECT MAINTENANCE PROCEDURES SHOULD BE FOLLOWED.

The following guidelines provide recommendations for your maintenance program. It is important that maintenance be done on a regular basis. It is recommended that inspections and cleaning be done routinely – at least annually.

A shorter interval should be used in marine or other corrosive environments and in areas prone to atmospheric fallout.

1. The complete window or door should be inspected regularly to ensure that it is still in good working order. Such things as the faulty hinges, warped windows and doors, and or distorted frames can put excessive load on other components reducing their operating life.
2. Dirt, grime and airborne salt deposits are often capable of causing damage to the product's surfaces and mechanism, including the cylinder barrel, and must be regularly removed.
3. The following cleaning process is recommended:
 - Cleaning should be done with a dilute solution of a mild liquid detergent in warm water. Avoid excessively hot solutions.
 - Use a soft bristle brush or similar to clean the surface. Do not use abrasive tools.
 - After cleaning, rinse surfaces thoroughly with fresh water.
 - Do not use strong solvent type cleaners on surfaces. Where it is necessary to remove materials from the surface (such as adhesives and a solvent is necessary) the weakest possible solvent should be used. The only solvents recommended are methylated spirits, white spirits or Isopropanol. Ensure the contact time for the solvent is kept to a minimum and that the solvent is thoroughly rinsed from the surface. A small test area should be checked prior to solvent cleaning to ensure that no damage to the film or colour change will occur.

- Where more aggressive cleaning is required, a very mild abrasive such as a high quality automotive cream polish, used in accordance with the manufacturer's instructions, may be necessary. The use of strongly abrasive compounds such as cutting compounds is not recommended.
- The use of bore water for cleaning is not recommended due to its mineral content, as it can bring about staining of the coating and may instigate long term coating failure.
- Ensure cleaning fluids do not penetrate into the lock or cylinder.

The use of products with soft finishes; such as gold plate, lacquered brass or chrome plate, need special care. Dirt or other contaminants must not be allowed to build up on the surface, as these will readily discolour and impair the surface.

Some change in colour, gloss or chalking may be expected dependant on exposure.

Key cylinders should be lubricated at least once a year or when there are signs of roughness when inserting or retracting the key. Remove any dirt, grime and salt deposits on and around the end of the cylinder barrel, and apply a small amount of lubricant to the keyblade and insert the key into the lock barrel to maintain a smooth action. Cylinders should be lubricated with 'Inox MX3' lubricant.

Exposed mechanisms and parts should be cleaned with a non-metallic brush. Apply a small amount of preferably Teflon based lubricant or alternatively light sewing machine 5W mineral oil to lubricate moving parts and prevent corrosion of exposed metal surfaces. Be careful not to apply an excessive amount of lubricant as this will have a detrimental effect of adhering dust to these surfaces, potentially reducing their life.
