

### **Borg warranty - Australia**

All Borg locks are warranted to be free from mechanical defects in material and workmanship under normal use and service for a minimum period of 12 months from date of sale.

However this warranty does not cover problems arising out of misuse, vandalism or improper installation. Our only liability, whether in tort or in contract, under this warranty is to repair or replace products which are returned to the LSC office, freight charges prepaid to the address below within the warranty period.

Our warranty shall only apply if the item returned is found by analysis by LSC personnel to be defective. After each lock has been examined a detailed report will be produced and sent to the customer.

This warranty is in lieu of and not in addition to any other warranty or condition, express or implied, including without limitations merchantability fitness for purpose or absence of latent defects.

A trouble shooting guide is provided with each lock but for further technical advice or information please contact your local LSC office.

Note: If passage function is required the F (passage function) tumbler should be placed in the F button cavity – remove the back plate by undoing the 4 red screws and place the non coloured tumbler in the cavity. Refit the back plate. It is important that you follow the instructions on how to use the F function.
