

Chubb safes Cash Ratings (updated 2022)

Below is a guide to the recommended maximum amount of cash a safe might carry when located in an ideal situation. The higher the safe cash rating the more security a safe will provide.

As a guideline, insurance companies will normally cover cash overnight up to the cash rating amount. The actual amount of cover may vary between insurance companies. Please check with your insurer and clarify what insurance cover they will provide.

As a general rule the valuables rating of a safe is normally multiplied by a factor of x 2 (this figure varies amongst insurance companies, it can be up to x 10) for the likes of jewellery and other valuable items. For example; a safe providing \$20,000 cash rating should provide cover for material items in domestic circumstances up to \$40,000. It is again recommended that clarification be confirmed with your insurer.

EN1143 – 1 is an official European standard for Grading safes, the recommended maximum cash ratings are also listed as a guide. Safes are tested by an independent testing authority within a controlled environment and are subject to a variety of tests. The system was devised by the insurance industry to give rating consistency Europe-wide.

European Std	Australian Std	Grade	Recommended Maximum \$
EN 1143 – 1		Grade 0	\$25k
EN 1143 – 1	AS/NZ3809	Grade I	\$45k
EN 1143 – 1	AS/NZ3809	Grade II	\$60k
EN 1143 – 1	AS/NZ3809	Grade III	\$100k
EN 1143 – 1		Grade IV	\$180k
EN 1143 – 1	AS/NZ3809	Grade V	\$300k
EN 1143 – 1		Grade VI	\$450k

Secure Cabinet Testing Standards:

S1	\$5k
S2	\$10k

Chubb safes Models available in New Zealand

Secure Cabinets (EN 14450) – Testing Standards
