

# ARDRICH PASSIVE AIR CARE

## Veria™ Passive Air Freshener Continuous Air Freshener System

- Environmentally friendly
- No propellants
- VOC compliant
- Refill is completely recyclable
- Operates without batteries
- Naturally-derived, biodegradable ingredients

### the Veria advantage

The Veria™ Passive Air freshener is about simplicity, advanced engineering and environmental sustainability. The unique refill load and wick system has been designed to provide a simple to use alternative to aerosol cans. Veria uses naturally-derived, biodegradable ingredients in all its refills which are of course, fully recyclable.

### Veria Refills

- 4 great fragrances
- Small and compact
- Quick to load
- Tamper resistant
- Cost effective

### Our fragrances

-  Ocean Breeze - ACV93003 - Reminiscent of fresh ocean breeze, the scent of distant forests and hints of exotic flowers.
-  Orange & Bergamot - ACV93007 - A classically inspired Eau fragrance with crisp refreshing notes of bergamot orange lemon and lavender.
-  Lemon Lime - ACV93008 - Fresh sparkling West Indian limes blended with preserved lemons and balsamic floral nuances.
-  Apple Berry - ACV93001 - Sweet fruity juicy green apple melded with piquant summer raspberries and hints of liquorice and wild violets. L

## Veria™ Passive Air Freshener Continuous Air Freshener System

Environmentally friendly  
No propellants  
VOC Compliant  
Refill is completely recyclable  
Operates without batteries  
Naturally-derived, biodegradable ingredients

## Environmental Impact

### Volatile Organic Compounds (VOCs)

This is a low VOC product. No aerosol propellants or solvents are used  
The product is safe to store and transport as it falls outside DG regulations

### Design

The Veria was designed with sustainability in mind . . .

- Size - less materials employed
- Recyclable plastics
- No batteries
- Renewable components
- 100% of the refill is recyclable

### Packaging

Minimal packaging is used at all times and is fully recyclable

### Product Life cycle

Raw Materials -	All materials are ultimately recyclable
Manufacturing -	A simplified process requiring low levels of energy and no discarded resources
Packaging, transportation -	Minimal impact due to product size and recyclability
Use -	Reduced impact on air quality when compared with alternatives
Disposal -	Fully recyclable

### Recycling

The refill is 100% recyclable and is safe to dispose of in regular plastic recycling waste  
The dispenser enclosure (ABS) is also fully recyclable

### Waste Minimisation

Veria complies well with the principle of minimal waste with no contribution to landfills

### Compliance

Low VOC's means the Veria is ideal for green building and LEED certification requirements  
Refills are compliant to California Air Resources Board regulations which regulate air quality, air pollution's and VOC emissions
