

BODY LOTION SOAP

FEATURES AND BENEFITS

Body Lotion Soap demonstrates the very latest technology in the formulating of an excellent skin cleanser which provides fast removal of soils on the surface of the skin and in the pores of the subcutaneous tissues whilst the very fine copious foam floats these soils away from the skin surface to be rapidly rinsed off, leaving the softening and protective skin conditioners as a barrier to protect the skin of even the most sensitive users.

Can be used as a skin cleanser and hair shampoo for all over personal care.

DIRECTIONS

Wet hands and rinse to remove gross soiling. Place 1-2ml of Body Lotion Soap in the palm and work up to a rich lather. Rinse off under fresh running water. Finish by air drying or using sterile cotton or paper towelling.
