

# Bio-UB

Readily Biodegradable Probiotic  
Enzyme for Under Bench grease traps

**Bio-UB** incorporates a blend of Probiotic Enzymes, readily biodegradable surfactants and an advanced blend of beneficial bacteria designed to work with under bench and in ground grease traps and converters.

With Probiotic Enzymes and an advanced blend of beneficial bacteria Bio-UB works with under bench and in ground grease traps and converters to accelerate the metabolic and degradation process of Fat, Oil and Grease (FOG).

**Bio-UB** contains a readily biodegradable surfactant matrix making it one of the most environmentally sustainable products on the market.

The combination of Probiotic Enzymes and Beneficial Bacteria contained in Bio-UB combines Enzymes and Bacteria together elevates the treatment of grease traps and converters from just an enzyme or just a bacteria-based treatments. Bio-UB combines both systems in one.

## FEATURES & BENEFITS

Probiotic Enzymes and Beneficial  
Bacteria in ONE

Readily Biodegradable Surfactants

Able to be dispensed automatically

Safe and positive for systems

Removes and manages odours

**BIOLOGICAL +  
BIODEGRADABLE =  
CLEANING**
