

# Bathroom Cleaner

## DESCRIPTION

Bathroom Cleaner and Disinfectant is a modern toilet and bathroom cleaner.

Its blend of acids and detergents gets in and dissolves soils leaving the surface clean and the pine fragrance giving the room fresh and clean feel.

Bathroom Cleaner and Disinfectant may be used neat or diluted depending on the level of soiling.

Soap scum, body fat, iron and calcium soils are removed easily with Bathroom Cleaner

## FEATURES AND BENEFITS

- Readily Biodegradable
- Long lasting perfume
- Excellent in removing soap scum, body fat and scale
- Foams for soil suspension
- Able to be diluted - great economy

## DIRECTIONS OF USE

### Shower:

Normal Cleaning: Dilute 3:1. Wet surface first with warm or hot water. Using a squirt bottle apply the chemical from the top. Allowing it to slide down the wall, using a green or white scourer with sponge go from side to side agitating the surface. Leave for 5 - 10 mins then rinse off. If required dry with a clean towel or microfibre cloth.

### Toilet:

Dilute 5:1. Half flush the toilet, using the squirt bottle apply to under the rim and allow to slide down the pan. If there is not visible signs of soiling do not use a brush. Toilet brushes are not clean.

If there is soil then allow to soften over 5 mins then use the brush to easily remove

### Sinks:

Dilute 5:1. Using a cloth apply the chemical, leave for a few minutes then rinse off and dry with a clean towel.
