

NUWARE

GENERAL DESCRIPTION

NUWARE is a white, granular, oxygen releasing compound, formulated to provide fast, safe de-staining for plastic ware, coffee pots, urns, and vending machine holding tanks, brew chambers and lines.

NUWARE positively lifts soils and organic stains without damage to china, plasticware or stainless steel. When used on stainless flatware it removes bluish haze and preserves its new look.

PROPERTIES

Biodegradable	All surfactants
Hard Water Stability	Very Good
pH @ 1% solution	10.8
Wetting Ability	Immediate
Metal Safety	Safe for use on aluminium

DIRECTIONS

Use 1/3 – 2/3 cup **NUWARE** per 10 litre hot water at 55⁰ - 65⁰C. For light stains, soak ware from 15 to 30 minutes. An overnight treatment may be used for removal of heavy stains.

NUWARE is also recommended for cleaning and de-staining coffee urns at 1-2 Tblspn per litre of hot water and as a pre-soak for stainless steel tableware.

RECOMMENDED RANGE OF USE CONCENTRATION:

Use range is 1/2 – 2 Tblspn **NUWARE** per litre depending upon soil or stain build up.

CAUTION: ALKALINE - Avoid contact with skin and eyes. Avoid breathing dust from powder. In case of contact, immediately flush skin or eyes with plenty of water; for eyes, continue flushing with water for at least 15 minutes and get medical attention.
