

VISION

VISION – is designed to be used without any need for further dilution. Water quality varies from place to place often resulting in streaking on glass and mirrored surfaces. VISION eliminates this problem.

SUPERIOR CLEANING

VISION – combines ammonia with a high performance solvent system, which promotes a cleaning ability not normally found in glass cleaners.

STREAK FREE

VISION – passes the test for quick and efficient streak free cleaning of glass surfaces due to the surfactant system specifically developed for that purpose.

PROPERTIES

Appearance	Clear blue liquid
Odour	Mild ammonia
pH	Typically 11.0
Wetting Ability	Instant
Foaming Tendency	Moderate (controlled)
Biodegradability	Yes; all surfactants
Rinsability	Easily achieved (*)

Rinsing is usually not a concern or required due to the method of product application by an absorbent lint-free cloth or product being removed by a squeegee.

SAFE TO USE

VISION – is non-flammable and incorporates the use of a non-toxic solvent system.

ECONOMICAL

VISION – is extremely economical in use due to the speed in which the job is done. Time is money and there is no wasteful elbow grease used in obtaining first time sparkling results.
