

# This is the future of Antibacterial Technology.

**Long-Lasting**  
Zoono lasts for up to 24 hours on skin & up to 30 days on surfaces

**Ultra-Gentle**  
Zoono doesn't use harsh chemicals or alcohol

**Scientifically Proven**  
Zoono's effectiveness has been verified by over 100 lab results

## Surface Sanitiser

Sanitising germ protection spray that kills 99.9% of germs and keeps critical surfaces and touchpoints hygienic for longer.

- + Protects against 99.9% of germs.
- + Water Based
- + Forms an antibacterial shield that bonds to surfaces
- + Alcohol Free

### Use After cleaning for ongoing germ protection:

ZOONO® complements your existing cleaning routine and keeps surfaces germ-free. Zoono won't wash off during your routine cleaning procedures.

### Doesn't contain harsh chemicals & can be used around food:

ZOONO® doesn't use alcohol or dangerous chemicals to kill germs and has food safety approvals in Australia and New Zealand.

Active Ingredient: Quaternary Ammonium Compound CAS 68424-85-1

Available in: 150ml, 250ml, 5l

**ZOONO®**  
AUTHORISED RESELLER

ZOONO® manufactures long-lasting hand and surface sanitisers that stop germs in their tracks. Backed by over 100 lab reports, it's the name you can trust to keep you, your family, and your business protected. Apply once in the morning and enjoy one less thing to worry about all day long.

## Our Technology

Zoono is an innovative sanitising technology that keeps working long after it's applied.

ZOONO® keeps working on the skin for up to 24 hours and on surfaces for up to 30 days. The ZOONO® 24 hour shield lets you go about your daily lives without having to worry about what you touch. It's that extra peace-of-mind and reassurance that you're protected from germs on other people and surfaces all day long. ZOONO® protects surfaces that harbour dangerous germs for up to 30 days, ensuring germs are not transferred by people from touch.

## How does Zoono work?

- 

1. Zoono bonds to the surface to create a protective layer
- 

2. The Zoono surface attracts pathogens
- 

3. The pathogen bursts like a balloon on contact
- 

4. And you're protected!

ZOONO® sets to surfaces using a magnetic bond. Up close, ZOONO® looks like a layer of tiny pins that cover a surface. When pathogens touch the surface, they pop!

This clever popping action is effective on 99.9% of pathogens! And when the cells pop, they are destroyed which means they can't evolve or mutate

## Efficacy & Testing

ZOONO® conforms to regulations from around the world and has passed PAS 2424, EN13697, EN1276, EN1650 amongst many more antimicrobial efficacy tests.
