

Laundersolv

Technical Bulletin

Product Description

Laundry Solv is a clear nearly colourless liquid with an orange odour. It is used as an oil and grease emulsifier in laundries. Laundry Solv helps remove difficult to remove soils such as oil off mechanics overalls and grease and fat deposits off table cloths.

Laundry Solv contains a specialised blend of surfactants and solvents that are designed to penetrate difficult to remove oily soils and emulsify them.

Laundry Solv also contains an orange oil solvent to assist in degreasing and leave a fresh orange odour.

Applications

How To Use

In a commercial laundry use Laundry Solv in the prewash cycle at 40°C for 6 - 8 minutes. Use either 250ml Laundry Solv on it's own, or 125ml (half cup) combined with ½ cup of detergent powder such as Optiwash or Motel per 25kg load. The main wash should use the detergent on it's own, or can use Laundry Solv as an additional booster if soil levels are high.

Laundry Solv can also be used in conjunction with an automated feeder system and will be set up by a technician at the correct level.

In domestic washing machines add Laundry Solv to your normal detergent at a rate of ¼ cup per 5kg using a warm to hot cycle. Use amount of detergent recommended for a heavily soiled wash.

If some stains are very bad, the Laundry Solv can be used to pre spot the stains before adding to the wash.

Technical Data

Laundry Solv is based on a blend of biodegradable non ionic surfactants, plus solvents and D-Limonene, a solvent made from the peel of oranges.

Laundry Solv has a pH of 8.5 in the neat form.

Pack Sizes

15L Drum	C21110
(2x5L Bottle) Carton	C21159
