ENCASE

ENCAPSULATING CARPET SHAMPOO

DESCRIPTION / APPLICATION

ENCASE incorporates crystallising polymer technology which enables residual encapsulated soil to be removed from the carpet with subsequent vacuuming. The polymer residue does not attract dirt or soil and helps to ensure the carpet stays cleaner for longer. ENCASE contains a gentle and fresh fragrance and allows carpets to be effectively cleaned and returned to use in minimal time. ENCASE is suitable for use on most carpet fibres.

FEATURES

- Superior dry-down performance
- Excellent stain removal
- Safe for use on most carpet fibres
- Outstanding re-soiling resistance
- Excellent detergency on greasy and heavily soiled carpet
- Keeps carpets cleaner for longer
- PATENTED

DIRECTIONS FOR USE

1. Vacuum area thoroughly to remove dry soil.
2. Dilute 40mL/L of Encase solution for normal soiling and 60mL for heavily soiled conditions.
3. Always pre-test the detergent on the carpet in a small inconspicuous area before using. This is to determine if the product is going to have any adverse effects on the carpet.
4. Apply Encase to carpet by either spray application or by feeding from a solution tank.
5. Thoroughly scrub the carpet with a Cimex, rotary or cylindrical brush machine using overlapping passes.
6. Manual cleaning may be performed using a suitable stiff bristled brush. Rinsing is not required.
7. Encapsulated soil and detergent can be vacuumed from the carpet once it is dry.

DILUTION:

Always pre-test a small inconspicuous area prior to first use. Areas to be cleaned should always be thoroughly vacuumed, preferably with a pile lifting vacuum, before cleaning with this product.

Carpet Shampoo: Dilute 40mL/Litre of water.

For heavily soiled conditions or for manual cleaning dilute 60mL/Litre of water.

Bonnet Cleaning: Dilute 50mL/Litre of water.

Spotter: Dilute 200mL/Litre of water.
