

DESCALER

HEAVY DUTY ACID CLEANER

▶ **RIGHT PRODUCT** ▶ **RIGHT ADVICE** ▶ **RIGHT AWAY**

DESCRIPTION

Descaler is a highly acidic chemical developed to remove rust, and medium levels of white mineral deposits from stainless steel, ceramic and painted surfaces.

APPLICATION

Descaler is designed to remove dirt, grime and calcium deposits from metal surfaces. It is especially useful in the cleaning of commercial catering equipment, heat exchanges and urinals. Descaler may also be used to remove grout smear on new tiles.

DIRECTIONS FOR USE

General Cleaning: Dilute at 1:50 with water.

Heavy Duty Cleaning: Dilute at 1:10 to 1:20 with water.

For best results use as a soak application.

For vertical surfaces product needs to be in contact in order to work, therefore contact application is required.

FEATURES & BENEFITS

- ▶ Removes calcium, scale and rust from metal and mineral surfaces.
- ▶ Suitable for use on a wide range of surfaces.
- ▶ Ideal for use with hard water areas where mineral deposits are common.
