

RINSE AID

DISHWASHER RINSE AID

► **RIGHT PRODUCT** ► **RIGHT ADVICE** ► **RIGHT AWAY**

DESCRIPTION

Rinse Aid is a blue, highly active, wetting agent which incorporates low foam surfactants and souring agents that is added to the final rinse water in automatic dishwashing machines to dramatically reduce the drying time of washed articles.

APPLICATION

Rinse Aid when added to the final rinse reduces the surfaces tension of the water and prevents water from forming droplets on a surface. Rinse Aid eliminates the need for manual towelling of washed articles, thus reducing the possibility of spreading pathogenic organisms.

DIRECTIONS FOR USE

Auto Rinsing: – Rinse Aid is dosed automatically into the final rinse water through an automatic dispensing unit.

FEATURES & BENEFITS

- Effective in hard or soft water
- Contains anti scaling agents
- Eliminates spotting and streaking
- Economical in use
- Low Foam Formula
