Product contains wheat, gluten, egg and milk;

Product may contain traces of soy and mustard. Bertagni does not handle these raw material inside the factory. Despite all our efforts , soy and mustard come from supply chain.

SO2 is contained in some raw materials used in the plants, as wine and vinegar. However, these ingredients undergo long cooking plus pasteurisation and this is enough to make the SO2 disappear from the final product. Therefore it is not necessary to declare the presence of sulphite.

Fish, crustaceans and nuts are handled only on Avio site, on dedicated and segregated line.

There is no risk of cross contamination with those allergens.
