## 16. OTHER INFORMATION

Advice regarding the danger of spontaneous combustion of oily rags.

After use, wash any rags or cloths in warm soapy water to remove the oil. Even after washing, rags must not be crumpled into a ball or left in a pile but instead should be spread out or hung up to dry out.

Use synthetic fibre cloths where possible as natural fibres (especially cotton) increase the risk of spontaneous combustion. Brushes and rollers should also be washed in warm soapy water.

The product should not be used for purposes other than those shown in Section 1 without first referring to the supplier and obtaining written handling instructions. As the specific conditions of use of the product are outside the supplier's control, the user is responsible for ensuring that the requirements of relevant legislation are complied with.

The information contained in this safety data sheet is based on the present state of knowledge and current national legislation. It provides guidance on health, safety and environmental aspects of the product and should not be construed as any guarantee of technical performance or suitability for particular application.
