

**BOSCH**

Invented for life

## **Solution 6000**

Your integrated security solution.

The Solution 6000 is a fully integrated access control and intrusion detection system supporting both wired and wire-free options. Combining an intuitive user interface and high-speed programming software makes it an easy-to-use complete security solution, ideal for a business premises or larger home.

# Solution 6000

## Expandable to Suit Your Needs

Whether you are looking to secure a home, a shop, or a commercial property, every premises is going to be different - with up to 144 zones, 16 doors and 990 users, the Solution 6000 can provide the perfect fit even in the largest of security applications.

## Easy Remote Arming

Wireless remotes can be used to arm and disarm your premises at the touch of a button, as well as to set the system in STAY mode (for when you want to be inside but secure your perimeter windows & doors), act as a portable panic button, and can even be used to switch lights and open gates & doors.

## Integrated Access Control

Access Control is no longer reserved only for larger, more expensive systems. The Solution 6000 incorporates Smart Card technology, designed to provide a higher level of security with access cards. Readers incorporate entry/exit and lock control built-in, making them suitable for anything from the front door of your home up to mid-sized commercial installations.

Up to 16 time zones can be set up, with each containing up to 4 time periods. Time zones can be used to automatically arm/disarm your security system at specific times, like locking a reception door at 5pm, as well as restricting user access to doors such as the warehouse after 4pm, or to control outputs, like gates that close automatically at 5.30pm. Programmed schedules can also extend to turning building lights and airconditioning systems on and off, providing a complete security & access solution.

## Simplistic Operation

The keypad features a graphical user interface that incorporates a text-driven menu system. Colour coded, illuminated keys make it easy to operate and easily identify Armed and Disarmed modes, and the status of access-controlled doors, while the built-in sounder provides audible feedback when operating the system. It also incorporates a built-in Smart Card reader, allowing users to simply present their token to the keypad to arm/disarm and/or unlock a door in one simple action. The WiFi enabled keypad allows the panel to join existing wireless networks in your home or business, using features like IP reporting and upload/download via IP to control the panel.

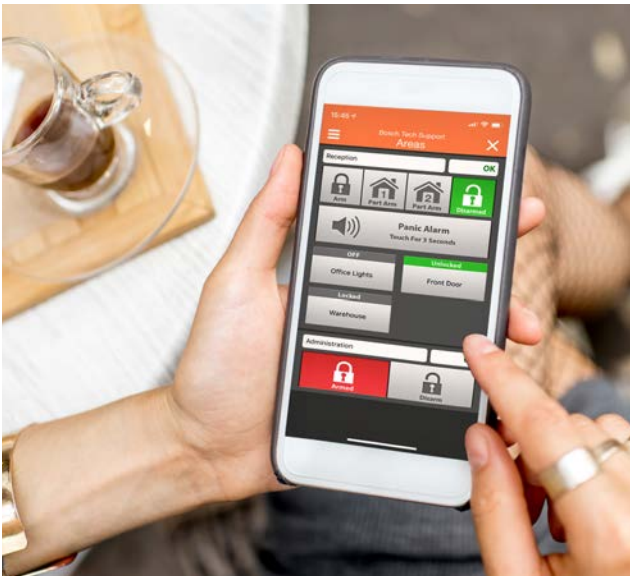

## Making System Admin Easy\*

Use **Site Manager** software to easily administer the day-to-day operations of your system. Ideal for security managers, it allows for remote control of multiple panels in different locations through IP networks, providing access / control of user lists, access control, time zones, as well as system and user activity logs.

Connect to the **MyAlarm** cloud security service to make use of the iFob Control app available on both IOS and AndroidOS. Check system status, arm or disarm, and operate doors and outputs. You'll never miss an alarm event with push, voice, SMS or email notification available. You will know when other users have armed or disarmed the system – like your children coming home, or your staff locking up when leaving.

*\* For IP connectivity, an IP module or WiFi keypad must be connected to the panel.*

## Useful Features

Chime mode allows you to audibly monitor a zone or group of zones, such as business entry doors for customers entering during business hours, or entry into storage areas while your system is disarmed. The chime mode feature is extremely useful for monitoring driveways and fire doors, as well as young children moving in and out of front or back doors at home.

The Solution 6000 provides the flexibility to divide your alarm system into several separately controllable areas including a common area (this can be a reception area, hallway, or underground carpark). It provides the flexibility for users to arm and disarm the areas that they have been given access to, without affecting other areas of your premises.

## System Features

Zones  
(up to 144 wired or wireless)

Door Access  
(Up to 16 doors)

Partitions/Areas  
(Up to 8 areas)

Outputs  
(up to 37, 5 on-board outputs)

Event Log  
(2000)

990 Users

## Other Features

- ▶ Integrated access and alarm
- ▶ Full text menu display for programming & user control
- ▶ Smart Card, Biometric and external readers, with external keypad options
- ▶ SMS via Bosch GSM & SMS panel control
- ▶ Cloud connectivity including push notification, remote control, and monitoring\*
- ▶ Supported communication formats include Conetix IP, GSM, SMS, Email, ContactID, GPRS, CSV IP, SIA 3+ Text, Voice and Domestic Dial

*\*Services provided by 3rd parties may incur additional charges.*

# Solution 6000 System Components

Any one of the IP modules shown on the right can be installed. IP via Wi-Fi is available when the Wi-Fi keypad is used.

- P/N - CM764B Plug On 4G LTE CAT1 Module with Magnetic Base Antenna
- P/N - CM368B IP Communications Module 4G LTE CAT1 / Ethernet
- P/N - CM751B IP Module
- P/N - CM101B Interactive Voice Control Module

P/N - SW5008 Upload/Download Software (V2.11 or higher)

P/N - SW501B Site Manager (IP Ethernet Connectivity Required)

P/N - CG1098 Solution 6000 Security Controller PCB

X1

P/N - CM195 Multi RF Receiver Interface

X1

RRFC-ST122 Receiver Directly Connected

X1

Panel supports direct RRFC-ST122 serial connection or via CM195.

RRFC Radion Repeater also available. Note: Repeater is not compatible with 2-Way SMART RF

X3

P/N - RF120 SMART RF LAN Base Station Receiver - 2-Way

P/N - HCT-4UL 4 Button Premium Keypad

P/N - RRFC-TBS / RRFC-F852 or 4 Button Wireless Remote with Encryption Only supported on RRFC-ST122

P/N - RT110 SMART RF - 5 Button

P/N - RF110FK Colour Fascia Kit to Suit RT110 Keypads

P/N - CP158B Slim Style External Keypad with Smart Card Reader

P/N - PR350 ISO Smart Card

P/N - PR301 Smart Card Token with Keyring

P/N - PR370 Dual Smart Card and EM Format Token

P/N - PR365 Adhesive Smart Card Sticker

External Smart Card Reader P/N - PR116B White P/N - PR115B Black

Internal Smart Card Reader P/N - PR114B White P/N - PR113B Black

Fingerprint Reader P/N - CM729B White P/N - CM728B Black

Graphic Keypad With Wi-Fi + Tamper P/N - CP41B White

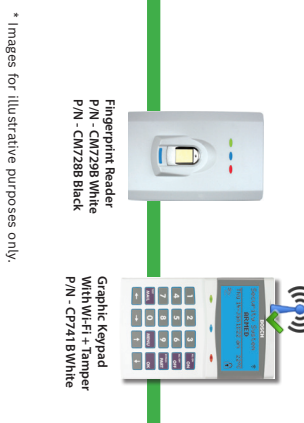

P/N - CM710B 4-Way LAN Relay Output Expander Module

P/N - CM720B 1AMP Power Supply & Battery Charger Module

P/N - CM707B 8 Zone Piggy Back Expander

\* Images for illustrative purposes only.

P/N - CP7998B Service Keypad Installer Tool

P/N - CM797B LAN Isolator Module

Up to 8 LAN Isolator modules can be connected. Isolators provide electrical isolation between LAN segments, reducing the chance of surge damage. Isolators can also be used to increase the total LAN length beyond 1200m.

P/N - CM704B 8/16 LAN Zone Expander

P/N - CM707B 8 Zone Piggy Back Expander

Up to 8 zone expanders of any type can be connected to the system. When using Single or Alarm & Tamper EOL, the CM707B can be installed to provide 16 zones on the CM705B Expander. The CM707B cannot be installed when using split EOL monitoring.

Max panel zone count configuration is:  
Single EOL = 136  
Alarm & Tamper = 136  
Split EOL = 144

P/N - CM4305 LAN to Ethernet Converter Module

P/N - CM705B 8/16 Universal LAN Zone Expander PMA Only

The CM7238 and CM7248 can be easily installed inside the CM550, MW720B and MW730B enclosures.

Legend:  
■ = Encrypted RS485 LAN  
■ = ISOLATED Encrypted RS485 LAN  
■ = Programmable Serial Input

Wi-Fi enabled Desktop Reader can support 3rd party readers up to 40 bits.

Desktop readers are for use with SolutionLink and Site Manager Software packages and allow user credentials to be born at the PC.
