Licensed to Maverick Abrasives: MIRS MSDS, (c) A V Systems, Inc.

OSHA Regulatory Status:		While this material is not classified as hazardous under OSHA regulations, this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.					
Potential Health Effects (Acute and Chronic):		Hazards not otherwise classified (HNOC) or not covered by GHS -none.					
		Prolonged or repeated skin	contact may cause	dermatitis.			
		Chronic:					
Inhalation:		The toxicological properties of this substance have not been fully investigated. High vapor/aerosol concentrations are irritating to the respiratory tract and may cause headaches, dizziness, anesthesia, drowsiness, unconsciousness, and other central nervous system effects including death.					
Skin Contact	:	Prolonged and/or repeated contact may cause irritation and/or dermatitis. Skin contact may aggravate existing dermatitis.					
Eye Contact:				ns are irritating to the eves.			
Ingestion:		Not available. High vapor/aerosol concentrations are irritating to the eyes. Aspiration hazard. May cause irritation of the digestive tract. The toxicological properties of this substance have not been fully investigated. Low viscosity material-if swallowed may enter the lungs and cause lung damage.					
	3. CO	MPOSITION/INFOR	MATION ON I	NGREDIENTS			
CAS #	Hazardous Com	ponents (Chemical Name)	Concentration				
1344-28-1	Aluminum oxide		30.0 -60.0 %				
64742-47-8	Hydrotreated light	t distillate (petroleum)	20.0 -30.0 %				
		4. FIRST All	D MEASURES	6			
Emergency and First Aid Procedures:		Consult a physician. Show this safety data sheet to the doctor in attendance. Move out of dangerous area.					
In Case of Inhalation:		If breathed in, move person into fresh air. Consult a physician. If inhaled, remove to fresh air. If breathing is difficult, give oxygen. Get medical aid.					
In Case of Skin Contact:		Wash off with soap and plenty of water. Consult a physician. In case of contact, flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical aid if irritation develops and persists. Wash clothing before reuse.					
In Case of Eye Contact:		Flush eyes with water as a precaution. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical aid.					
In Case of Ingestion:		Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician. Get medical aid.					
Signs and Symptoms Of Exposure:		The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11					
	any immediate ntion and specia eded:	No data available. I					
Note to Phys	ician:	Treat symptomatically and supportively.					

	5. FIRE FIGHTING MEASURES					
Flash Pt:	40.00 C (104.0 F) Method Used: Estimate					
Explosive Limits:	LEL: No data. UEL: No data.					
Autoignition Pt:	> 230.00 C (446.0 F)					
Suitable Extinguishing Media	:Use water spray, dry chemical, carbon dioxide, or appropriate foam.					
Fire Fighting Instructions:	 Wear self contained breathing apparatus for fire fighting if necessary. Further information: As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Vapors can travel to a source of ignition and flash back. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Use water spray to keep fire-exposed containers cool. Flammable liquid and vapor. Vapors may be heavier than air. They can spread along the ground and collect in low or confined areas. May accumulate static electrical charges, and may cause ignition of its own vapors. Runoff from fire control or dilution water may cause pollution. 					
Flammable Properties and Hazards:	No data available.					
Hazardous Combustion Products:	No data available.					
	6. ACCIDENTAL RELEASE MEASURES					
Protective Precautions, Protective Equipment and Emergency Procedures:	Use personal protective equipment. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas. For personal protection see section 8.					
Environmental Precautions:						
Steps To Be Taken In Case Material Is Released Or Spilled:	Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container for disposal according to local regulations (see section 13). Keep in suitable, closed containers for disposal. Use proper personal protective equipment as indicated in Section 8. Spills/Leaks: Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. Avoid runoff into storm sewers and ditches which lead to waterways. Clean up spills immediately, observing precautions in the Protective Equipment section. Remove all sources of ignition. Use a spark-proof tool. Provide ventilation.					
	7. HANDLING AND STORAGE					
Precautions To Be Taken in Handling:	Avoid contact with skin and eyes. Avoid inhalation of vapor or mist. Keep away from sources of ignition - No smoking. Take measures to prevent the build up of electrostatic charge. For precautions see section 2. Wash thoroughly after handling. Use with adequate ventilation. Ground and bond containers when transferring material. Use spark-proof tools and explosion proof equipment. Avoid contact with eyes, skin, and clothing. Empty containers retain product residue, (liquid and/or vapor), and can be dangerous. Keep container tightly closed. Avoid ingestion and inhalation. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty containers to heat, sparks or open flames. Keep away from heat, sparks and flame.					
Precautions To Be Taken in Storing:	Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Storage class 510): Combustible liquids Non Combustible. Keep away from sources of ignition. Do not store in direct sunlight. Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances. Flammables-area.
