

Terminal Barriers

- These barriers are insulated between the phases for increase insulation level.
- It also can be easily mounted, even if the circuit-breaker is already installed, just insert them in the corresponding slots.
- They are incompatible with both the insulating terminal covers.
- It is possible to mount the phase separating partitions between two circuit-breakers side

Part Number	Description	Suitable MCCB
LS-FBA53-TS	Barrier for front connection	TS1000/1250/1600
LS-ABA53-TS	Barrier extension terminal	TS1000/1250/1600
LS-PPR53-TS	Barrier plate	TS1000/1250/1600
