Smart Security for Small Business.

PROTECT

Serious protection made for everyday business.

Whether you run a retail store, café, office or small warehouse, the **Solution 2100 & 3100** brings everything together in one easy-to-manage security system. It's designed to be simple for staff to use, yet powerful when it matters most—helping protect your premises, people and assets without adding complexity to your day.

Built on Bosch's long-standing reputation for quality and engineering excellence, it's security you can rely on—day after day, shift after shift. From opening and closing routines to after-hours protection, your system works in the background, delivering dependable performance, flexible control, and real-time visibility from wherever you are.

Protect your business, your team, and your livelihood—with confidence.

SMALL COMMERCIAL

One system, built for business.

Split your system into separate areas to operate how your space is used, where each area can be armed and monitored independently, allowing staff to access only what they need while keeping the rest of the premises secure.

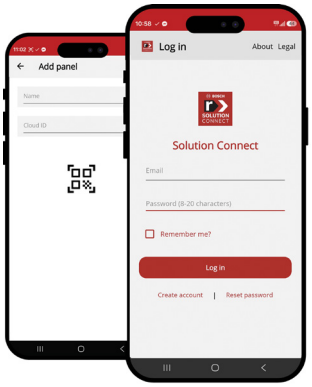

Retail stores: Secure stockrooms separately from the shop floor, with controlled staff access.

Hospitality venues: Manage front-of-house and back-of-house areas independently during trading hours.

Offices: Restrict entry to sensitive areas like server rooms or management offices.

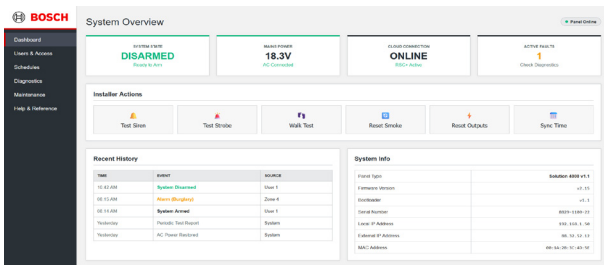

Shared spaces: Enable multiple tenants or departments to operate independently within one system.

SYSTEM CONTROL, YOUR WAY

Use the **Solution Connect** app for simple, everyday control to arm or disarm the system, check status, and review activity logs in seconds.

For business owners or managers who want deeper insight, the system also supports advanced control and configuration through a **web interface**, providing greater visibility across your entire operation.

The web interface provides you with:

- convenient & easy user code management.
- panel status & helpful diagnostics at your fingertips.

SCENARIOS

How your security system supports everyday business operations.

OPENING AND CLOSING ROUTINES

Ensure your business is secured every day. Staff can quickly arm or disarm the system at opening and closing, while activity logs record who accessed the premises and when, providing accountability and peace of mind.

AFTER-HOURS PROTECTION

Once the doors are closed, your system continues working. You can even automatically arm your premises after hours on a daily schedule to ensure full protection overnight.

RESTRICTED AREA CONTROL

Keep sensitive areas secure. Limit access to stockrooms, offices, or cash handling areas with dedicated zones and user permissions, particularly useful in retail and hospitality environments.

DELIVERIES AND CONTRACTOR ACCESS

Need to let someone in while you're off-site? Use the app to remotely disarm or control outputs like roller doors, making it perfect for deliveries or maintenance access without compromising security.

MULTI-TENANCY OR SHARED SPACES

Operating in a shared building? Split the system into 2 separate areas so multiple businesses or departments can operate independently, while still using one system.

PANIC AT YOUR FINGERTIPS

If a situation escalates, staff can trigger a panic alarm instantly using a keyfob or button—providing fast response when it's needed most.

SOLUTION 2100 & 3100: DESIGNED FOR DAILY OPERATIONS

Simple to use. Powerful when it matters.

- Arm and disarm using keypads, remotes, or smartphone app.
- Control access for multiple staff with individual user codes.
- Create separate zones for front-of-house, back-of-house, or restricted areas.
- Monitor activity logs to see who opened or closed the business.
- Expand easily as your business grows or layout changes.

Security you can trust. Built for business.

MORE THAN JUST SECURITY

Go beyond intrusion detection. Use your system to control connected devices such as lighting, signage, or roller doors to help streamline your business operations and improve efficiency.

ALARM SYSTEM FEATURES:

- up to 8 wired zones on a Solution 2100
- up to 16 wired or wireless zones on a Solution 3100
- 2 areas
- up to 32 users (code / keyfob or both)
- Web Interface Management with B428-M module
- Solution Connect app (iOS & Android)

Home Security you can rely on.

PROTECT

Serious protection made for everyday living.

For families who want to feel safe at home—day and night—the **Solution 2100 & 3100** brings everything together in one easy-to-use security system. Designed to be simple to control but powerful when it matters, it gives you confidence that your home is protected without adding complexity to your day. Built on Bosch's long-standing reputation for quality, innovation and engineering excellence, it's security you can rely on—today, tomorrow, and as your needs grow.

From busy school mornings to quiet nights at home and everything in between, your system works in the background, delivering reliable protection with intuitive controls, smart alerts, and access from wherever you are.

SAFETY FIRST

Secure all areas and access points.

Whether you're home, away at work, on holidays, or just stepping out, the **Solution 2100 & 3100** works quietly in the background to keep everyone safe.

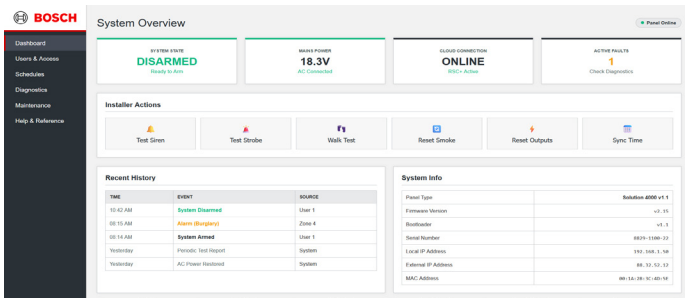

Arm or disarm your system in seconds using a keypad, remote, or smartphone app, and stay connected with real-time updates. With flexible zones, dependable performance, and simple everyday operation, the system adapts to how your family lives - so security feels effortless, not complicated.

SYSTEM CONTROL, YOUR WAY

Use the Solution Connect app for simple everyday use: arm/disarm, check status, and view activity—quick and easy from your phone.

For users who want deeper visibility and system control, the **web interface unlocks more advanced capabilities** through an intuitive, user-friendly experience for clear, guided system management.

SCENARIOS

How your home security system helps in everyday family life.

DOOR OR WINDOW LEFT OPEN

Heading out in a rush? Protecting the house perimeter means the security system can alert you if a door or window has been left open, so you can act before it becomes a risk.

KIDS HOME FROM SCHOOL

Wondering when the kids got home? Check activity through the app and see exactly when the system was disarmed and by which user —keeping you informed even when you're not there.

AUTOMATIC ARMING

Forget to set the alarm at night? Set schedules so particular zones or unused areas of your system arm themselves—giving you one less thing to worry about.

PANIC AT YOUR FINGERTIPS

Feel unsafe or need help fast? Use your keyfob or panic button to instantly trigger an alarm - no need to reach the keypad.

MORE THAN JUST SECURITY

Use your system to control things like garage doors, lighting, or other smart connected devices - right from your phone.

HOUSE AND GARAGE CONTROL

One system, multiple spaces. Secure your house and garage separately, or together, with flexible zoning and area control - perfect for larger homes, multi-storey living or granny flats.

SOLUTION 2100 & 3100: DESIGNED FOR EVERYDAY LIVING

Simple to use. Powerful when it matters.

- Arm and disarm your system with keypads, remotes, or your smartphone.
- Add wireless sensors for doors, windows, and motion detection where needed.
- Create separate zones for different areas of your home.
- Control everything remotely using a mobile app.
- Expand the system as your family or property grows.

Security you can trust. Protection made simple.

ALARM SYSTEM FEATURES:

- up to 8 wired zones on a Solution 2100
- up to 16 wired or wireless zones on a Solution 3100
- 2 areas
- up to 32 users (code / keyfob or both)
- Web Interface Management with B428-M module
- Solution Connect app (iOS & Android)

BOSCH

SOLUTION CONNECT

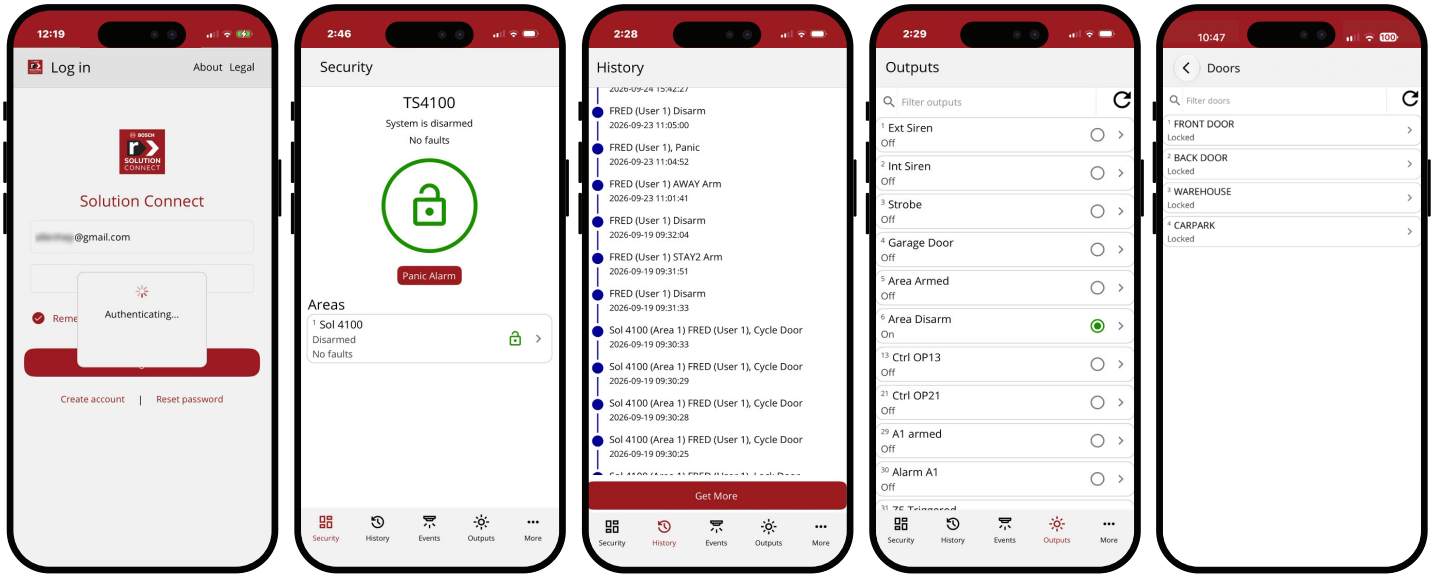

CONTROL

SECURITY CONTROL. ANYTIME, ANYWHERE.

Whether you're protecting your family home, managing a retail store, or running a busy office, the Bosch SOLUTION CONNECT app keeps you connected to your Solution alarm system wherever you are. **Simple to use and available at no additional cost**, it's compatible with any Bosch Solution 2000 / 3000 / 4000 / 2100 / 3100 / 4100 Series alarm panel, giving you the confidence of knowing you can monitor and control your property at any time, from anywhere.

Simple to use. Powerful when it matters.

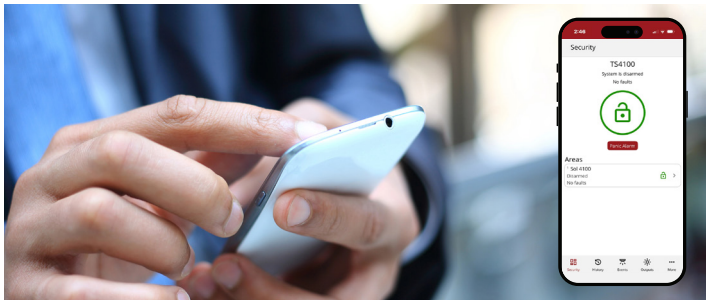

- Arm and disarm your system remotely from your smartphone or tablet.
- Receive instant push notifications about important events.
- Check the status of your system and connected sensors at any time.
- Review activity history and user actions from anywhere.
- Control connected devices such as garage doors, gates, roller doors, lighting or signage.
- Access system information and perform common system functions directly from the app.

SCENARIOS

How SOLUTION CONNECT helps in everyday life and business operations.

FORGOT TO ARM THE SYSTEM?

Left home or closed the business in a hurry? Open the app and arm your system from virtually anywhere, helping ensure your property remains protected when you're not there.

KIDS HOME FROM SCHOOL

Want to know when family members arrive home? View activity history and receive notifications when the system is disarmed, giving you greater awareness and peace of mind throughout the day.

BUSINESS OPENING AND CLOSING

Business owners can quickly check whether staff have opened or secured the premises, review user activity, and confirm the system status without needing to be onsite.

DELIVERIES AND TRADES ACCESS

Need to provide access while you're away? Remotely operate connected doors, gates or roller doors for deliveries, trades, or maintenance personnel without compromising security.

AFTER-HOURS PEACE OF MIND

Whether you're on holiday, at home, or managing multiple locations, instant notifications and live system status help you stay informed about what is happening at your property after hours.

STAY CONNECTED. STAY IN CONTROL.

From checking that the house is secure to managing staff access at your business, SOLUTION CONNECT delivers the convenience, visibility, and confidence modern users expect. Wherever you are, your Bosch Solution alarm system is only a tap away.

MORE THAN JUST SECURITY

Go beyond intrusion detection. Use the SOLUTION CONNECT app to control connected devices such as garage doors, gates, lighting, signage, or warehouse roller doors directly from your phone. It's a simple way to improve convenience at home and streamline everyday business operations.

Available for iOS and Android.
