

# TB25 Drop Bolt

The Lockwood Padde Series TB25 range of drop bolts represent true engineering innovation, design excellence and the superior quality customers have come to expect and demand from Lockwood. Designed for use on swing-through, double action doors and ideal for applications where an electric strike is impractical.

## Features

- High Security: bolt is deadlocked in the extended position
- Bolt position monitored
- Door position monitor with integrated magnet in the strike plate (no need to install a separate reed switch)
- Multiple orientation, drop bolts will work horizontally or vertically
- Power to Lock/Power to Open
- Continuously rated solenoid
- Tamper proof: lock cannot be defeated by slipping a metal object between lock and striker plate
- Intelligent electronics: these intelligent bolts will attempt to re-close the bolt 8 times, allowing time for swing through doors to settle in the closed position
- Thermal protection: in the event of solenoid overheat, a thermal fuse will operate eliminating any fire risk
- 5 Year Tricare Warranty (Padde Series)

## Applications

- Misaligned doors
- Timer doors

## Product Details

<b>Voltage</b>	12 to 24V
<b>Current (Start)</b>	1100mA @ 12V, 1000mA @ 24V
<b>Current (Holding)</b>	210mA @ 12V, 90mA @ 24V
<b>Holding Force</b>	1000kg
<b>Locking Mode</b>	Fail safe or Fail Secure (non field selectable)
<b>Dimensions (Mortice)</b>	164 x 22 mm
<b>Bolt Length</b>	12.7 x 16 mm
<b>Face Plate Size</b>	10 x 25 mm
<b>Monitoring Contacts</b>	Bolt and Door

## Standards and Compliance

	CE Approved
	C-Tick Certified

# TB25 Drop Bolt

## Ordering Information

Part Number	Product Description
<b>TB25-1</b>	TB25 D/Bolt 12-24Vdc Fail Safe Monitored
<b>TB25-2</b>	TB25 D/Bolt 12-24Vdc Fail Secure Monitored
<b>Accessories</b>	
<b>228250-000</b>	EB25 SS Short Strike Plate RH
<b>228250-002</b>	EB25 SS Long Strike Plate RH
<b>228250-003</b>	EB25 SS Housing
<b>228250-004</b>	EB25 SS Dress Plate
<b>228250-005</b>	EB25 L Bracket with Magnets
<b>228250-006</b>	EB25 L Bracket without Magnets

## Specification Statement

The bolt must be able to operate in horizontal and vertical orientations. The position of the bolt must be monitored as well as have an integrated reed switch for door position monitoring. The electronic functions must include: 8 x lock and unlock attempts, 8 second unlock delay, automatic relock after 8 seconds, power reduction circuitry to limit the holding current and a one time thermal fuse cut-out in case of solenoid overheating. The face plate and strike plate must be finished in stainless steel.
