Receiver

Warning: The system is NOT a lifesaving device. Normal precautions should be kept, such as vigilantly monitoring the whereabouts of young children, maintaining fencing system in good shape, and never providing any way children can use to climb over the fence, and etc. The transmitter should be mounted out of reach of children to prevent children from being able to reach and press the Adult Pass button.

Key Features

- Completely wireless; there is no cabling at all – so easy to install and maintain
- Really loud up to 100dB – you will not miss it, even with a noisy lawn mower or washing machine in the background
- Adjustable volume to suit different sized homes – for ultimate comfort; it can be exactly as loud as you need it
- Voice warning and status announcement – about low battery, communication interrupt and gate open/close
- The transmitter is fully water proof and designed to survive the Australian summer
- Fully remote controlled - you can turn on and off remotely, from anywhere in the home
- Two relay outputs - giving great flexibility to connect other control devices, like alarm panels
- Adult Pass button allows adults convenient access without initiating the alarm
- Wide wireless range of 150m in the open air - comfortably cover the vast majority of homes
