

# DSRF 2 Channel Relay Output Receiver

[www.boschsecurity.com.au](http://www.boschsecurity.com.au)

**BOSCH**  
Invented for life

- ▶ Removes the need to wire from the control panel
- ▶ Provides relay outputs which can be operated from the RF3334, RF-HCT4UL-FOB and the Radion Keyfob FB

The HCR-BU2 receiver is designed to provide relay outputs which can be operated from any of the DSRF transmission type keyfobs supplied by Bosch Security Systems. These keyfobs are The RF3334, RF-HCT4UL-FOB and the Radion Keyfob FB.

This receiver removes the need to wire from the control panel to an external device such as a garage door or gate to operate the device. The HCR-BU2 can be powered from 12 to 24V AC or DC.

The product is supplied as a PCB only with no housing. This allows installation into gate motor housing etc.

The two relays are activated by the 'alarm' and 'light' buttons on the RF3334 and RF-HCT4UL-FOB keyfobs.

On the Radion keyfob the 'Dot' and 'Double Dot' buttons are used.
