- **101-268** - 14 inch Cabinet Tamper Kit

M1 Controller

The Ness M1 Gold offers unequalled value to System integrators, installers, and end-users.

The M1 Gold boasts a rock-solid security foundation with the most imaginative and powerful automation functionality available. Integrators and Installers will value the flash memory firmware, RS-232 serial port, ethernet connectivity option, fast PC programming, and ease of installation.

End users will welcome the quality and futuristic capabilities of the versatile keypad, voice telephone dialler and the built-in telephone remote. The 500+ word vocabulary pleasantly announces system status, configurable in any sequence to alleviate user intimidation.

M1 offers the flexibility to integrate industry-standard systems and components for easy upgrades and system expansion. In addition to the powerful digital dialler, the M1 has a built-in voice dialler, which can call any phone, on or off-site, including a mobile phone. Remote telephone control capability allows you to perform tasks; such as, change the temperature setting, control the water heater, lower the garage door, set lighting scenes, arm/disarm the system, control sprinklers, and more by simply picking up the phone – any phone.

User interface options include

- Touch screens and keypads - up to 16 keypads can be installed
- Computer - allows total control of your system via the management software.
- Internet interface - allows users to secure a 'virtual keypad' anywhere in the world.
- IR remote control - allows control of any IR remote control device - aircon, CD, DVD, TV etc
- Access control - alarming/disarming and door access via optional proximity readers.
- Radio Keys - wireless remote control alarming/disarming and panic function
- 2-way voice - using any telephone and optional 2-way voice feature.
- Telephone control - using your mobile phone for easy arming and disarming, light operation etc.
