PRODUCT HL1260

HIGH SECURITY MOTORISED HOOK LOCK

HL1260

PRODUCT DESCRIPTION

The patented HL1260 is a high torque motor driven hook lock for a sliding door. It can be installed vertically in the door frame (lock style) with the strike plate mounted on the edge of the door.

Alternatively there is a surface mount box for the strike plate and/or lock for a sliding door.

The HL1260 can also be mounted with the surface mount box on the door header with the face plate on the face of a swing door.

The HL1260 is considered a "Green Product" as it consumes an in-rush current of 290mA@12VDC only during locking and unlocking action (active Mode), then in the locked or unlocked state (Sleep-Mode), the drop Bolt consumes current less than 15mA@12VDC.
