

SAFETY DATA SHEET

PRO-BLUE PONGO SACHET (PEROXIDE FREE)

Infosafe No.: CI09X
APPROVED Date : 09/06/2022
APPROVED by: CUSTOM CHEMICALS
INTERNATIONAL PTY LTD

1. Identification

GHS Product Identifier

PRO-BLUE PONGO SACHET (PEROXIDE FREE)

Product Code

0010335

Product Type

Powder in sachet

Company name

CUSTOM CHEMICALS INTERNATIONAL PTY LTD (ABN 73 050 537)

Address

103-107 Potassium Street Narangba
QLD AUSTRALIA
AUSTRALIA

Telephone/Fax Number

Tel: 07 3204 8300

Fax: 07 3204 8311

Emergency phone number

13 11 26 in Australia (AH)

Recommended use of the chemical and restrictions on use

Portable Toilet Additive

2. Hazard Identification

GHS classification of the substance/mixture

Hazardous to the Aquatic Environment - Acute Hazard: Category 3

Sensitisation - respiratory: Category 1

Sensitisation - skin: Category 1

Signal Word (s)

DANGER

Hazard Statement (s)

H317 May cause an allergic skin reaction.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

H402 Harmful to aquatic life.

Precautionary statement –General

P102 Keep out of reach of children.

P103 Read carefully and follow all instructions.

Pictogram (s)

Exclamation mark, Health hazard

Precautionary statement –Prevention

- P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
P272 Contaminated work clothing should not be allowed out of the workplace.
P273 Avoid release to the environment.
P280 Wear protective gloves.
P284 [In case of inadequate ventilation] wear respiratory protection.

Precautionary statement –Response

- P302+P352 IF ON SKIN: Wash with plenty of water.
P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P321 Specific treatment (see on this label).
P333+P313 If skin irritation or rash occurs: Get medical advice/attention.
P342+P311 If experiencing respiratory symptoms: Call a POISON CENTER/doctor.
P362+P364 Take off contaminated clothing and wash it before reuse.

Precautionary statement –Disposal

- P501 Dispose of contents/container to an approved waste disposal plant.

Other Information

This SDS and the Hazard Classifications contained therein, only apply to the product in its concentrated form, as supplied. When diluted to 1:20 or greater they no longer apply. However, good hygiene and housekeeping practices should be adhered to

3. Composition/information on ingredients

Ingredients

Name	CAS	Proportion
Enzyme protein (1-10%)	9001-05-2	0-<10 %
Cellulase Enzyme	9012-54-8	0-<10 %
Various	Various	0-≈100 %
Bacterial Spore	N/A	0-<10 %

4. First-aid measures

First Aid Measures

Eye wash station. Normal washroom facilities.

Inhalation

Remove victim to fresh air away from exposure. Obtain medical attention if symptoms occur.

Ingestion

Do NOT induce vomiting. Do NOT attempt to give anything by mouth to an unconscious person. Rinse mouth thoroughly with water immediately. Give water to drink. If vomiting occurs, give further water to achieve effective dilution. If symptoms persist, seek medical attention.

Skin

Immediately wash contaminated skin with soap and plenty of water. Remove contaminated clothing and wash before re-use. Seek medical advice (e.g. doctor) if you feel unwell or if irritation, burning or redness persists.

Eye contact

If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove contact lenses. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or

for at least 15 minutes. Immediately call a POISON CENTER/doctor

First Aid Facilities

Eyewash, safety shower and normal washroom facilities.

Advice to Doctor

Treat symptomatically.

Other Information

Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New Zealand 0800 764 766).

5. Fire-fighting measures

Fire Fighting Measures

Keep containers, exposed to extreme heat, cool with water spray. Fire fighters to wear self-contained breathing apparatus if risk of exposure to products of combustion or decomposition.

Suitable Extinguishing Media

Use an extinguishing media suitable for surrounding fires

Hazards from Combustion Products

Non-combustible material. However, if involved in a fire will emit toxic fumes.

6. Accidental release measures

Emergency Procedures

Minor spills do not normally need any special clean-up measures. Risk of major spill is reduced while product is retained in dissolvable sachet. In the event of a major spill, increase ventilation. Evacuate all unprotected personnel. Wear sufficient respiratory protection and full protective clothing to prevent exposure. Prevent spillage from entering drains or water-courses. Wear appropriate protective equipment as in section 8 below to prevent skin and eye contamination. If material is in contact with water, may result in a slip hazard and should be absorbed into dry, inert material (e.g. sand, earth or vermiculite), which then can be put into appropriately labelled drums for disposal by an approved agent according to local conditions. Residual deposits will remain slippery. Wash area down with excess water. If contamination of sewers or waterways has occurred advise the local emergency services. In the event of a large spillage notify the local environment protection authority or emergency services.

7. Handling and storage

Precautions for Safe Handling

Avoid eye contact with contents of dissolvable sachet. Wear gloves and protective clothing when risk of exposure occurs. Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep packaging closed at all times. Avoid physical damage to packaging. Wash hands with water after handling. Work clothes should be laundered. Launder contaminated clothing before re-use.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well-ventilated area, out of direct sunlight. Protect from freezing. Store in suitable, labelled containers. Keep containers tightly closed. Store away from incompatible materials.

8. Exposure controls/personal protection

Occupational exposure limit values

National Occupational Exposure Limits, as published by National Occupational Health & Safety Commission:

Time-weighted Average (TWA):

None established for product.

Short Term Exposure Limit (STEL):

None established for product.

Appropriate engineering controls

Risk of inhalation is reduced when product is contained in dissolvable sachet. If sachets are damaged or ruptured measures should be taken to reduce risk of inhalation. Where engineering controls are not effective than an approved respirator with a replaceable dust/particulate filter should be used. Reference should be made to relevant standards. For Australia and New Zealand AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices and AS/NZS 1716, Respiratory Protective Devices.

Respiratory Protection

While subject to risk assessment, generally, not required for typical applications with contained material as per label directions. If engineering controls are not effective in controlling airborne exposure then an approved respirator with a replaceable vapor/mist filter should be used. Refer to relevant regulations for further information concerning respiratory protective requirements.

Reference should be made to Australian Standards AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.

Eye Protection

While subject to risk assessment, generally, not required for typical applications with product contained in dissolvable sachet as per label directions. Safety glasses should be used for handling concentrate in quantity, cleaning up spills or broken sachets, decanting, etc. Eye protection devices should conform to relevant regulations. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.

Hand Protection

Wear gloves of impervious material such as butyl rubber, natural latex, neoprene, PVC and nitrile to handle in quantity, clean up spills or broken sachets, decanting, etc. Final choice of appropriate gloves will vary according to individual circumstances. i.e. methods of handling or according to risk assessments undertaken. Occupational protective gloves should conform to relevant regulations. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance

Body Protection

While subject to risk assessment, generally, not required for typical applications with contained material as per label directions. Suitable protective workwear, e.g. rubber or plastic apron, sleeves, boots and cotton overalls buttoned at neck and wrist are recommended. Chemical resistant apron is recommended where large quantities are handled.

Other Information

No exposure standards have been established for this material, however, the TWA exposure standards for dust not otherwise specified is 10 mg/m³. As with all chemicals, exposure should be kept to the lowest possible levels. TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week. Source: Safe Work Australia

9. Physical and chemical properties

Properties	Description	Properties	Description
Form	Solid	Appearance	Powder enclosed in dissolvable sachet
Colour	Dark blue	Odour	Characteristic
Freezing Point	Not available	Boiling Point	Not available
Solubility in Water	Partially soluble	pH	6.0- 8.0 neat
Vapour Pressure	Not available	Viscosity	Not available
Volatile Component	<5% v/v	Flash Point	Not flammable
Flammability	none		

10. Stability and reactivity

Reactivity

Stable at normal temperatures and pressure

Conditions to Avoid

Extremes of temperature and direct sunlight.

Incompatible materials

Acids, oxidizing agents.

Hazardous Decomposition Products

Thermal decomposition (burning) may result in the release of toxic and/or irritating fumes.

11. Toxicological Information

Toxicology Information

Not classified as toxic, based on ingredients. Oral LD50 (ATE calculated): >2000mg/kg

Ingestion

Ingestion may irritate the gastric tract causing nausea and vomiting

Inhalation

May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Skin

May cause an allergic skin reaction

Eye

Exposure to product within sachet may cause eye irritation.

Respiratory sensitisation

Classified as a Category 1 respiratory sensitizer due to enzymes Catalase and Cellulase

Skin Sensitisation

Classified as a Category 1 skin sensitizer.

Germ cell mutagenicity

Not considered to be a mutagenic hazard.

Reproductive Toxicity

Not considered to be toxic to reproduction

STOT-single exposure

Not expected to cause toxicity to a specific target organ.

STOT-repeated exposure

Not expected to cause toxicity to a specific target organ.

Aspiration Hazard

Not expected to be an aspiration hazard.

12. Ecological information

Persistence and degradability

Readily Biodegradable, based on ingredients.

Mobility

Due to its physico-chemical characteristics, highly mobile in the environment and will partition to the aquatic compartment.

Bioaccumulative Potential

No bioaccumulation is expected.

Other Adverse Effects

Not available

Environmental Protection

Do not discharge this material in bulk quantities into waterways.

13. Disposal considerations

Disposal considerations

Dispose of waste according to applicable local and national regulations. Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes including emptied containers are controlled wastes and should be disposed of in accordance with all applicable local and national regulations

14. Transport information

Transport Information

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

U.N. Number

None Allocated

UN proper shipping name

None Allocated

Transport hazard class(es)

None Allocated

IMDG Marine Pollutant (MP)

No

Marine Pollutant

No

15. Regulatory information

Poisons Schedule

S5

16. Other Information

Date of preparation or last revision of SDS

9th June 2022

Other Information

This SDS summarizes at the date of issue our best knowledge of the health and safety hazard information of this product. Particularly, how to safely handle and use this product in the workplace. Since the supplier cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this SDS in the context of how the user intends to handle and use the product in the workplace. If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact this supplier.
