

SAFETY DATA SHEET

SPA CLEAN

Infosafe No.: 5GEQ5
ISSUED Date : 06/10/2021
ISSUED by: CUSTOM CHEMICALS
INTERNATIONAL PTY LTD

1. Identification

GHS Product Identifier

SPA CLEAN

Product Code

0010069

Company name

CUSTOM CHEMICALS INTERNATIONAL PTY LTD (ABN 73 050 537 674)

Address

103-107 Potassium Street Narangba
QLD AUSTRALIA

Telephone/Fax Number

Tel: 07 3204 8300
Fax: 07 3204 8311

Emergency phone number

13 1126 in Australia (AH)

Recommended use of the chemical and restrictions on use

Water based disinfectant cleaner

2. Hazard Identification

GHS classification of the substance/mixture

Classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) including Work, Health and Safety Regulations, Australia.

Classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Eye Damage/Irritation: Category 1

Skin Corrosion/Irritation: Category 1B

Signal Word (s)

DANGER

Hazard Statement (s)

Causes severe skin burns and eye damage.

Causes serious eye damage.

Pictogram (s)

Corrosion

Precautionary statement –Prevention

Do not breathe dust/fume/gas/mist/vapours/spray.
Wash contaminated skin thoroughly after handling.
Wear protective gloves/protective clothing/eye protection/face protection.

Precautionary statement –Response

IF SWALLOWED: rinse mouth. Do NOT induce vomiting.
IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
Immediately call a POISON CENTER or doctor/physician.
Wash contaminated clothing before reuse.

Precautionary statement –Storage

Store locked up.

Precautionary statement –Disposal

Dispose of contents/container to to an approved waste facility..

3. Composition/information on ingredients

Ingredients

Name	CAS	Proportion
Alkyl dimethyl benzyl ammonium chloride	68424-85-1	0-10 %
Alcohols, C12-15, ethoxylated	68131-39-5	1-5 %
Non Ionic Surfactants	N/A	<1 %
Other ingredients classified as non hazardous at the concentrations used according to the criteria of Safe Work Australia	-	-

4. First-aid measures

Inhalation

If inhaled, remove affected person from contaminated area. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position. Apply artificial respiration if not breathing. Seek medical attention.

Ingestion

Do not induce vomiting. Wash out mouth thoroughly with water. If vomiting occurs, give further water to achieve effective dilution. Seek immediate medical attention.

Skin

Wash skin with plenty of water. Ensure contaminated clothing is washed before re-use or discard. Seek medical attention if burning, irritation or redness develops.

Eye contact

If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove contact lenses. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. Seek immediate medical attention.

First Aid Facilities

Eyewash, safety shower and normal washroom facilities.

Advice to Doctor

Treat symptomatically.

Other Information

For advice in an emergency, contact a Poisons Information Centre (Phone Australia 131 126) or a doctor at once.

5. Fire-fighting measures

Fire Fighting Measures

Keep containers exposed to extreme heat cool with water spray. Fire fighters to wear self contained breathing apparatus if risk of exposure to products of combustion or decomposition.

Suitable Extinguishing Media

Use Carbon Dioxide fire extinguisher, water fog or fine spray.

Hazards from Combustion Products

Non combustible material however if involved in a fire will emit toxic fumes.

Specific Hazards Arising From The Chemical

This product is non combustible.

Hazchem Code

2X

6. Accidental release measures

Spills & Disposal

Minor spills do not normally need any special clean up measures. In the event of a large spill, prevent spillage from entering watercourses. Wear appropriate protective equipment (as listed in Section 8 of this SDS) to prevent eye and skin contamination.

Spilt material may result in a slip hazard and should be absorbed into dry, inert material to be collected in appropriately labelled containers for disposal by an approved agent according to local regulations.

Residual deposits will remain slippery, wash down with excess water. If required, neutralise with sodium metabisulphite or sodium thiosulphate. If contamination of drains or sewers occurs advise local emergency services.

Clean-up Methods - Large Spillages

In the event of a large spill notify local environmental protection authority.

7. Handling and storage

Precautions for Safe Handling

Avoid contact with incompatible materials. When handling DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash hands with water after handling.

Conditions for safe storage, including any incompatibilities

Store in a cool dry well-ventilated area. Do not store in aluminium or light alloy containers. Keep containers closed when not in use, securely sealed and protected against physical damage. Inspect regularly for deficiencies such as damage or leaks.

8. Exposure controls/personal protection

Occupational exposure limit values

No Exposure Limit Established

Appropriate engineering controls

Ensure ventilation is adequate to maintain air concentrations below exposure standards. Avoid generating mists of the product. Use in a well ventilated area.

Respiratory Protection

Not required for normal cleaning operations with adequate ventilation.

Eye Protection

The use of safety glasses with side shield protection, goggles or face shield is recommended to handle in quantity, cleaning up spills, decanting etc.

Hand Protection

Wear gloves. Overalls, work boots & elbow length gloves are recommended for handling the concentrated product in quantity, cleaning up spills, decanting etc.

Materials suitable for detergent contact - Butyl rubber, natural latex, neoprene, PVC and nitrile.

9. Physical and chemical properties

Properties	Description	Properties	Description
Form	Liquid	Appearance	Clear pink liquid
Odour	Fragrant	Freezing Point	Approx 0°C
Boiling Point	100°C	Solubility in Water	Miscible in all proportions.
Specific Gravity	1.04 (25°C)	pH	9.0 - 11.0 (neat)
Vapour Pressure	Not available	Volatile Component	ca. 90%
Flash Point	Not flammable		

10. Stability and reactivity

Chemical Stability

Stable under normal conditions of storage and handling.

Conditions to Avoid

May corrode mild steel, copper, aluminium and zinc fittings.

Incompatible materials

Incompatible with anionic surfactants, certain inorganic silicates and nitric acid.

Hazardous Decomposition Products

Product can decompose on combustion to form Carbon Monoxide, Carbon Dioxide, and other possibly toxic gases and vapours.

11. Toxicological Information

Toxicology Information

No adverse health effects expected if the product is used in accordance with this Safety Data Sheet and product label.

Acute Toxicity - Oral

For Quaternary Ammonium Compounds LD50(Rat): 240 mg/kg

Ingestion

Ingestion of this product may cause nausea, vomiting, abdominal pain and irritation to the throat, mouth and stomach. may affect behaviour (Central Nervous System depression, depression) and metabolism. May also affect the respiratory system, cardiovascular system, liver & kidneys.

Inhalation

Inhalation of mists and aerosols may cause mucous membrane and respiratory irritation.

Skin

Causes severe skin burns. Harmful in contact with skin. May cause redness, itching & irritation in the event of extended contact with concentrated product .

Eye

Causeds serious eye damage. When splashed in the eyes, concentrated solutions may cause severe burns, pain and eye damage.

Chronic Effects

Prolonged and repeated skin contact with diluted solutions may induce eczematoid dermatitis.

12. Ecological information

Ecotoxicity

Very toxic to aquatic life with long lasting effects. Do not discharge to drains, sewers or waterways.

Persistence and degradability

Individual components stated to be biodegradable.

Mobility

Product miscible in all proportions with water. Do not discharge bulk quantities into drains, sewers or waterways.

Environmental Protection

Prevent large amounts from entering waterways, drains and sewers.

13. Disposal considerations

Disposal considerations

Dispose of waste according to applicable local and national regulations. Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes including emptied containers are controlled wastes and should be disposed of in accordance with all applicable local and national regulations.

14. Transport information

Transport Information

This material is classified as a Class 8 Corrosive Substances Dangerous Goods

Class 8 Dangerous Goods are incompatible in a placard load with any of the following:

- Class 1: Explosives
 - Division 4.3: Dangerous when wet Substances
 - Division 5.1: Oxidising substances
 - Division 5.2: Organic peroxides
 - Class 6, Toxic or Infectious Substances, if the Class 6 dangerous goods are cyanides and the Class 8 dangerous goods are acids
 - Class 7: Radioactive materials unless specifically exempted
- and are incompatible with food and food packaging in any quantity.

Strong acids must not be loaded in the same freight container or on the same vehicle with strong alkalis. Packing Group I and II acids and alkalis should be considered as strong.

U.N. Number

1760

UN proper shipping name

CORROSIVE LIQUID, N.O.S.(contains Quaternary ammonium compounds)

Transport hazard class(es)

15. Regulatory information

Regulatory information

Classified as Hazardous according to the Globally Harmonised System of classification and labelling of chemicals (GHS) including Work, Health and Safety regulations, Australia

Classified as a Scheduled Poison according to the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP)

Poisons Schedule

S5

Australia (AICS)

All ingredients listed.

16. Other Information

Date of preparation or last revision of SDS

SDS reviewed: Oct 2021, Supersedes: Oct 2016

Uses and Restrictions

Fill spa bath with cold water to normal operating level. Pour 50mL of SPA CLEAN into the spa (dose covers up to 200L of water) and turn on the jets. Run for 3 - 5 minutes before turning the jets off and draining the bath. To finish wipe all surfaces with a damp cloth and rinse bath.

User Information

SPA CLEAN is a concentrated cleaner and sanitizer designed to perform three important functions in a spa bath maintenance program - cleans, sanitizes and re-odorises. Powerful surfactants and scale dissolving compounds remove soap scum, body fats, oils and mineral build-ups from the spa bath and internal components. The quaternary ammonium compounds provide the necessary sanitizing properties. A strong residual fragrance leaves spa baths smelling fresh and new with cologne aroma. New improved formulation SPA CLEAN is low foaming so that foam levels do not create problems.

Other Information

DO NOT MIX WITH OTHER CHEMICALS WITHOUT PRIOR CONSULTATION WITH THE MANUFACTURER. Always use product as directed. Never return any unused material to original drum.

The information sourced for the preparation of this document was correct and complete at the time of writing to the best of the writers knowledge. The document represents the commitment to the company's responsibilities surrounding the supply of this product, undertaken in good faith. This document should be taken as a safety guide for the product and its recommended uses but is in no way an absolute authority. Please consult the relevant legislation and regulations governing the use and storage of this type of product.
