CARBINE

THE NEXT GENERATION IN LOCKING

An easy-install customisable digital lock with a key override. The electronic digital door lock's keyless entry keypad offers convenience while the LKW5 (C4) keyway key override improves security. Designed for simple DIY installation and operation that means the lever "handing" can be rapidly changed in-situ.

Convenient: Keyless entry keypad unlocking.

Secure: Key override with LKW5 (C4) keyway.

Simple: DIY installation with in-situ changing of lever handing.
