

CL100 DigiLock

By taking our standard CL100 Mortice and adding the functionality of a digital lock, we can offer customers high security that is upgradeable (by changing pin numbers) and dependable.

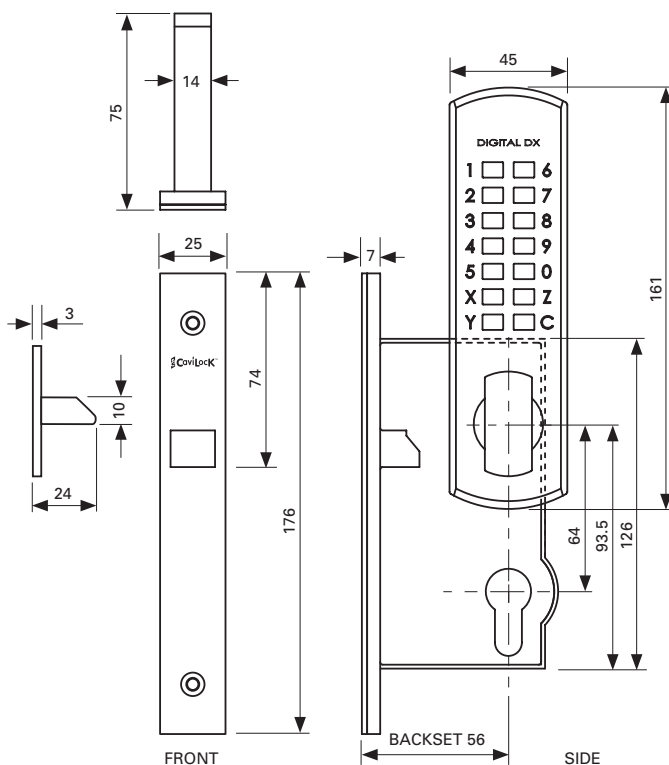

This lock can be set to "slam lock" which means every time the door is closed it is locked and requires pin code access to open. There is an added function of dual security - this lock can be supplied with pin code + key access, meaning you need both access passes to get in!

Finishes available: SCP or PB.

Construction

Case:	Diecast Zinc
Internal Parts:	Bronze/Brass
Screws, springs etc:	Stainless Steel
Faceplate & striker:	Brushed Stainless Steel or Brass (depending on finish req.)

Dimensions

Drawings & pictures are not to scale. All dimensions in millimetres.
