

MEETING-STILE FRAMELESS GLASS SEAL

The IS7400 is a semi-translucent glass mounted meeting stile and door edge seal for frameless glass sliding doors.

This high-performance seal is designed to suit 12mm or larger sized glass doors, providing draught and dust protection along with ambient & medium temperature smoke containment. This high performance PVC gasket protects glass doors from colliding during closure. These seals have an easy self-adhesive application and can be used independently for various glass door systems.

Gap size

- Single: Min. 3mm / max. 6mm (prior to installation)
- Double: Min. 6mm / max. 12mm (prior to installation)
