LENLOK BRASS NON-REKEYABLE PADLOCKS

The Lenlok General Use Padlock Series are made from brass and with a hardened steel shackle are a consistent performer. These are available in many forms to suit various customer needs ranging from different body sizes, shackle lengths, and shackle diameters.

- The key code is easily identified by a number stamped on the head of the key, for example 201. This signifies that you have a 20mm body padlock (20) keyed alike on group number one (1) = 201.
- The numbering system follows through the padlock range eg 403 (40mm body padlock on group number 3), 507 (50mm body padlock on group number 7) etc
- Padlocks such as described above can be reordered on the same key number again and again
- Padlock is a brass body with a hardened steel shackle
