

Your Premium Dental Partner

Let us help you build your brand

Looking for a cost-effective, high impact way to brand your practice? Try our personalisation service on your next order.

We can personalise products with your surgery logo and contact details so that your patients keep you front of mind.

Personalising a product that your patients use every day is an ideal opportunity to build your practice by turning a toothbrush, floss or other quality CareDent product into your own individual 'business card'.

Image resolution

It is important that all images are of suitable resolution for the highest print quality. Please see details below to avoid pixelation of your artwork.

- PSD and TIFF Checklist
 - The resolution of the file is a minimum of 720dpi
 - The file is CMYK
 - Do not include any alpha channels or masks
- Ai, EPS and PDF Checklist
 - Please ensure the files do not contain any non-vector graphics
 - Colours used must be formatted to CMYK
- Fonts
 - For EPS, Ai or PSD files, all fonts used in the artwork are required to be supplied with text converted to outlines

Please note fonts without outlines will not print as well and could affect the look of the finished product.
