Disposable tips for a air-water syringe

**Outstanding hygiene
No sacrifice on clinical
outcomes**

Non contractual document - Ref. 299094 (10/2016) - Copyright © 2016 PIERRE ROLLAND - All rights reserved. No information or part of this document may be reproduced or transmitted in any form without the prior permission of PIERRE ROLLAND.

INNOVATION CLINICALLY PROVED

20 YEARS
OF INNOVATION
FOR HYGIENE
IN DENTAL PRACTICE

FLEXIBLE

- More flexible tips and very easy to bend
- With non shape-memory: keep the ideal curve

DRY AIR

Two separate tubes guide air and water from the syringe to the end of the tip, ensuring totally dry air.

ECONOMICAL

Saves time (no need for cleaning /disinfection/sterilization, so, no need to ensure traceability, etc).

SAFE

- Protection for the patient, the practitioner and assistants
- Reduced risk of direct or cross-contamination
- No risk of ingestion: safety-locking device

ECOLOGICAL

- Tips made from entirely recyclable food-quality plastic
- Environmentally-friendly
- Pollution free in the case of combustion

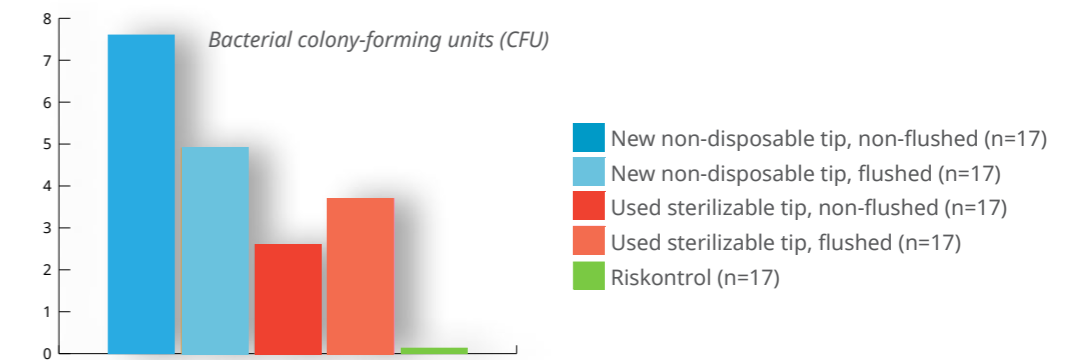

UNIVERSAL

- Adapters* available for any type of equipment
 - Adapters in anodized aluminium, Propylux®, stainless steel or resin, very easy to screw or clip onto the syringe of your unit,
- *Class I medical devices

LOW BACTERIA
LEVEL: THE SOLUTION
FOR A BETTER
HYGIENE

Non-disposable syringe tips are difficult to clean and thus to sterilize properly. More bacteria can be found after standard sterilization protocols, than in Riskontrol Disposable tips ($p < 0.001$).¹

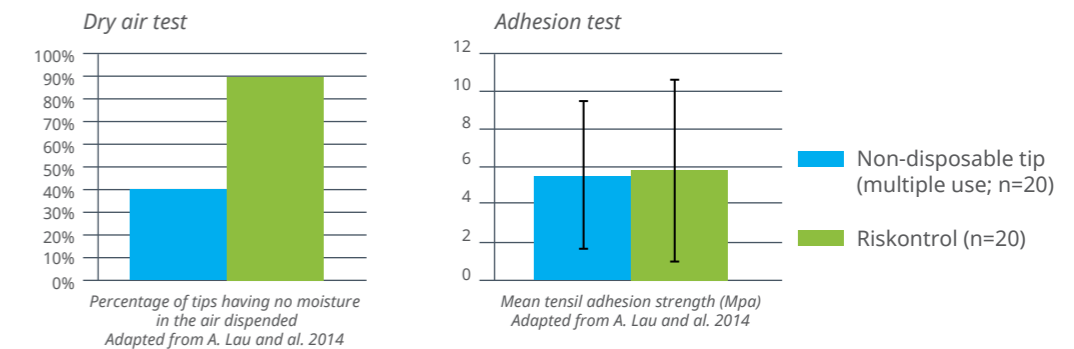

Moreover, after many sterilization cycles, the inside of non-disposable tips shows signs of corrosion. The roughness of the water lumen wall can more easily retain contaminants such as bacteria.

Hygiene is a true advantage for practitioner and patient. Riskontrol is an opportunity to limit cross-contamination in dental offices, and thus to protect patients and dental practitioners.

SAME CLINICAL
OUTCOME:
STRONG DENTINE
BONDING

Riskontrol also delivers perfectly dry air, mandatory to dry the dentine surface and obtain strong adhesion results.²

Dry air for strong adhesion to dentine. Using Riskontrol enables you to keep all the efficacy of your air & water syringe with less risk of cross-contamination.
