

Visalys[®] Temp – Fracture resistant, comfortable, impressive.

The temporary crown and bridge
material from Kettenbach

Simply professional.

Visalys® Temp

Visalys® Temp is a temporary crown and bridge material for exceptionally stable and fracture-resistant short- and long-term temporary restorations based on a multifunctional acrylic composite. Visalys® Temp is suitable for fabricating temporary crowns, partial crowns, bridges, inlays, onlays, and veneers.

Exceptionally stable and fracture resistant

- ✓ Particularly high values for impact strength, flexural strength, diametrical tensile strength, and elastic modulus.
- ✓ Satisfied customers thanks to noticeably fewer fractures/repairs.
- ✓ Can also be used for long-term temporary restorations (> 4 weeks).

Easy to use

- ✓ Saves valuable time: smooth surface and high luster even without polishing.
- ✓ Comfortable processing: minimal smear layer, precise milling, minimal dust.

High aesthetics

- ✓ Tooth-like translucency and opalescence ensure optimal integration into the existing dentition thanks to the chameleon effect.
- ✓ Natural fluorescence; available in three shades.
- ✓ Also suitable for very challenging anterior teeth temporary restorations.
